45 Years Before the Public. THE CENUINE

DR. C. McLANE'S

CELEBRATED

IVER PILLS

FOR THE CURE OF

Hepatitis, or Liver Complaint, DYSPEPSIA AND SICK HEADACHE

Symptoms of a Diseased Liver.

DAIN in the right side, under the I edge of the ribs, increases on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight, dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy Several of the above symptoms attend the disease, but cases have occurred where few of them existed, yet examination of the body, after death, has shown the LIVER to have been extensively deranged.

AGUE AND FEVER.

DR. C. McLane's Liver Pills, in CASES OF AGUE AND FEVER, when taken with Quinine, are productive of the most happy results. No better cathartic can be used, preparatory to, or after taking Quinine. We would advise all who are afflicted with this disease to give them a FAIR TRIAL.

For all bilious derangements, and as a simple purgative, they are unequaled

BEWARE OF IMITATIONS.

The Canadian parliament at Ottawa was opened by the Marquis of Lorne, Friday. The Princess Louise, upon arriving at the parliament building, was received with a royal salute. The Governor General who soon followed, had the vice regal salute. The princess occupied the seat on the throne.

Three hundred feet of track of the Mine Hill branch of the Philadelphia and Beading Railroad, caved Friday, without a moment's warning, into the workings of the Richardson colliers, near Glen Corbon. It will take several months to fill the cavity and have the road

The Pottsville, (Pa.,) Miner's Journal has published a letter of President Cowan, of the Philadelphia and Reading Railroad, exposing Philadelphia and Reading Railroad, exposing the secrets of the organization known at the "Knights of Labor," which have been in existence in Schuylkill county over a year. He says the general miner's strike was ordered by the society to take place February 16, in case the men were not paid wages by that time, but postponement was ordered until the 20th by which time all will be paid. He gives the names of the committee called "McNulty's gang," appointed and organized for the pur pose of burning coal-breakers and other reporter in case of a strike, and gives other pose of burning coal-breakers and other property in case of a strike, and gives other details of the organization. The publication of the letter create a sensation only second to the exposure of the notorious Molly Maguire

In the United States Circuit Court in New Yerk, the judge has directed a verdict for the plaintiff for four hundred and forty-two thou-sand dollars in the suit of the People's Savings Bank, Providence, against the estate of the late Evan Hoyt, of the firm of Hoyt, Sprague & Co. The action was to recover the difference between the amount and the loan and the pro-

between the amount and the loan and the proceeds of the sale of the security.

The large flouring mill of Parks & Best, Litchfield, Ill., burned Sunday, together with its contents. Loss \$50,000.

The Nevada Assembly has adopted a concurrent resolution urging the President to sign the Anti-Chinese bill, which passed the Senate Saturday.

Judge McKenna of the United States Circuit Court has appointed Oliver Ames, Mass., receiver of the \$2,000,000 note in litigation in Boston, given by the Union Pacific Railroad Company to the Credit Mobilier.

R. H. Chillon, Adjutant-General of Gen. Lee, and since the war president of the Col-umbus Manufacturing Company. Columbus, Miss, fell dead at his desk Tuesday. Age

FOREIGN NEWS.

A Liverpool dispatch says: Trade here is quite paralyzed by the strike, which has now extended to the carters and the whole body on extended to the carters and the whole body of carpenters, some of whom were already of strike. The strike among sailors has become more general, and great difficulty is experienc-ed in obtaining crews, save at increased rates. Yesterday several ships were awaiting crews, and the men were firm. It is stated that there and the first were the same 35 grain laden ships at Queenstown, and that the owners don't know, where to send them. Meanwhile the grain may be heating in the vessel holds and prove valueless. There are many reports of intimidation by dock laborers and others to prevent men from work-

The German Reichstag was opened at Berlin Wednesday by the Emperor William in person In his speech from the throne he said that he thanked the members for assisting in that he thanked the members for assisting in the suppression of the socialist agitation, and hoped they would continue to support the government as far as was necessary for the cure of the socialistic evil. Referring to the customs policy of the government the Emperor said: Our commerce has a right to claim that protection which the legislation regarding customs taxes can afford, and which is afforded, perhaps beyond what is necessary, in countries with which we trade. My duty is to preserve the German market for articles of home production. We should revert to well tried principles, which we, in our commercial policy, since 1865, have abandoned. doned.

The speech closed with the following sentence: The promotion and development of friendly relations with and among the powers is a task to which should be devoted the great power achieved by German unity.

Gen. Grant and party have arrived at Bom-Gen. Peel, the famous English turfman, is

The weavers at Ashton-under-Tyne went on strike Thursday. The masters will probably lock out the spinners, although they desire to continue work. There have been further continue work. There have been further stoppages of mills and notices of reduction of wages. Forty firms in Bolton give notice of ten per cent. reduction in wages. The spinners offer to accept a reduction of 5 per cent. If the masters refuse the offer, ten thousand spinners will strike. spinners will strike.

The official journal says that the latests re ports of the plague are reassuring. It has not increased, and energetic measures have been adopted for its suppression. The French govadopted for its suppression. ernment has dispatched physicians to investi ernment has dispatched physicians to investigate the disease. The reports that the plague has appeared in Turkey are unfounded. There is no ground for panic, and no danger for the present from arrivals from the Black Sea or the Sea of Azov. Nevertheless the Minister of Commerce has ordered a quadrantine of two days at French ports on the Mediterranean, and in Algeria, including arrivals from the Black Sea and Sea of Azov, even when provided with a clean bill of health.

The dissolution of the German Reichstag is expected within a month on account of the opposition of the majority to protection.

A dispatch from Rome says, a decision has just een arrived at, at the Vatican, to create cer-

tain new dioceses in the United States, in consequence of the growth of the church in this country.

The Moscow journals were not allowed to appear Friday until they suppressed the un-favorable plague news.

The Turkish Minister of Finance announce that a new loan has been concluded, and declares that it will in a great part be devoted to buying up paper currency, at 25 per cent of

CONGRESS

Feb. 11.-In the Senate Mr. Windom (Rep. Minn.), from the conference committee on the Naval Appropriation bill, submitted a report which was agreed to and the bill passed. Mr. Windom said that the Senate added \$86,500 to the House till. Windom said that the Senate added \$50,000 to the House bill. The House conferees receded from the disagreement to amendments involv-ing \$11,500 and the Senate receded from amendments involving \$75,000 additional for provisions and clothing. The bill as agreed upon appropriated \$14,029,968, being \$122,638 less than the appropriation for the present fis-cal year, and \$157,412 less than the estimates for next year.

In the House the conference report on the

Naval appropriation bill was agreed to.

The House then went into committee of the

whole on the Legislative Appropriation whole on the Legislative Appropriation of the Mr. Patterson (Rep., N. Y.) opposed that portion of the bill which proposes to transfer the coast and geodetic survey from the Treasury to the Interior Department. That provision would virtually abolish the system of public land surveys. The bill would throw an insurmountable obstacle in the way of the settlement of the public domain. ment of the public domain.

Feb. 12.-In the Senate at the conclusion of feb. 12.—In the Senate at the conclusion of the morning business, Mr. Saunders (Rep., Neb.) called up the bill recently introduced by him to authorize the President temporarily to transfer the custody, control and management of certain Indians from the Interior to the War Department. He spoke at length in fa-vor of educating the Indians to enable them to become citizens

vor of educating the limitals to clashe them to become citizens.

Mr. Anthony (Rep., R. I.) presented a memorial of the Colonization Society asking an appropriation of \$25,000 for explorations and surveys on the west coast of Africa, with a view to promoting commerce. Ordered printed

and referred. and referred.

In the House the conference report on the bill to abolish the volunteer navy of the Uni-

ted States was agreed to.

The testimony taken by the Judiciary Committee in the matter of Judge Blodgett, Chicago, was ordered printed, also the Senate bill in regard to the census and the amendments of the House Committee on Census.

Feb. 13.—In the Senate the House bill to re-Feb. 13.—In the Senate the House bit to restrict the immigration of Chinese was taken up and Mr. Sargent (Rep., Cal.) advocated the measure, He argued that it was within the constitutional power of Congress to legislate in contravention of a treaty. This power had been sustained by the courts and executive departments. The principle was laid down by Hamilton, that the power of self-defence resides in the nation, and a nation must exercise it, even though it act selfishly. China was not in favor of the emigration of her people. Therefore the passage of the bill, he did not believe, would make any changes in our commercial relations with China. At the proper time he (Sargent) would propose amendments to the bill, providing that it should not effect embassies nor shipwrecked persons. There were now in California more Chinamen than there were voters, and they were increaseen sustained by the courts and executive dethan there were voters, and they were increasing enormously. There was in San Francisco a city within a city, a city cut out of Pekin.

a city within a city, a city cut out of Pekin.

Mr. Matthews (Rep. O.) opposed the bill and said he was not willing to let the occasion pass without putting on record some of his reasons for opposing it. His respect for the plighted faith of a nation, in solemn treaty with a sovereign power, would compel him to seek to accomplish a remedy by some other means than by an arbitrary act of Congress. He read from the Burlingame treaty and said that we solicited from China the covenants which we were now about to break, and we were we were now about to break, and we were

we were now about to break, and we were about to do it by putting the stamp of hypocrisy on ourselves.

In the House, a letter was referred to the Committee on Ways and Means from the Secretary of the Treasury, stating that there will probably be a deficit in the revenue of the Correspond to the part fiscal year, of twenty. Government, the next fiscal year, of twenty-seven million and asking authority to issue four per cent bonds to cover such deficiency

Feb. 14.—In the Senate. After considering bills on the calendar, consideration was resumed of the bill to restrict Chinese immigration, and Mr. Blaine, (Rep. Me.), advocated it. He argued that the legislation designed was in

He argued that the legislation designed was in strict accord with international obligations.

Mr. Thurman (Dem., O.) said that to him it seemed perfectly clear that it would be ruinous to this or any other country, to say that a treaty could be only ended by the negotiation of a new treaty. If that doctrine was true, the empire of China, by refusing to precitate a new treaty, could held the to negotiate a new treaty, could hold the United States to this, no matter how pernicious it might be to us. He argued that the power of abrogating treaties rested in Congress. The immigration of Chinese to the United States always had been a more suitable subject for legislation than for treaty. In case a treaty should be simply abrogated, the Chinese could still come to this country un-Chinese could still come to this country un-less there was legislation to prevent them. China was the last country to insist upon the immigaation of her subjects, when for ten centuries she shut out the whole world. We had three races on this continent now—the white man, the black man, and the red man white man, the black man, and the red man-and we wanted no more mixtures. He was in favor of the migration of white people to this country, because every one of them added strength and wealth to the nation; but that

was not the case with the Mongolian.

Mr. Sargent (Rep., Cal.,) submitted several
amendments to the bill of a verbal character, amendments to the bill of a verbal character, and they were agreed to. He also submitted an amendment as an additional section, providing that the act shall not apply to persons officially connected with the Chinese government, or any embassy thereof, or to persons rescued from shipwreck during the voyage of and by the vessel bringing the same within the jurisdiction of the United States. Agreed to. Also an amendment directing the President, immediately upon the approval of the act, to immediately upon the approval of the act, to give notice to the government of China of the abrogation of articles 5 and 6 of the additional articles of the treaty of June 18, 1858. commonly called the Burlingame treaty. Agreed

Senator Bruce was called to the chair to-day and presided over the Senate a portion of the afternoon—the first time in the history of the Government that a colored man has occupied

In the House there was a long discussion on the "war claims" bills, to pay John T. Armstrong, of Virginia, \$1,840 for the rent of a wharf in Alexandria during the war.

Mr. Conger (Rep., Mich.) opposed the bill, contending that if the principle of the bill

was a correct one, troops that march across a long bridge ought to be preceded by army wagons loaded with specie to meet the enemy and pay the owners of property which was to be used for war purposes what they demanded for their property.

Feb. 15.—The Senate amended and passed the bill to restrict the Chinese immigration. The final vote stood 39 to 27. The House spent most of the day discussing the legislative appropriation bill, adopting some amendments and rejecting others. The bill was not pressed

Feb. 17.—In the Senate the bill to amend the Internal Revenue laws containing an amendment to reduce the tax on tobacco was considered. Mr. Eayard (Dem., Del.), who had charge of the bill, explained that there were important amendments which affected the revenue. It was known that more than one-third of our excise duties were than one-third of our excise duties were drawn from the simple agricultural product of tobacco. Since 1875 the tax had been 24 cents per pound on every variety of manufactured tobacco, excepting snuff, which was subjected to a tax of 32 cents per pound. The House sent the Senate a proposition to reduce the tax on all manufactured tobacco to 16 tents are recovery. cents per pound. The Senate committee non-concurred in this, but agreed to reduce it on all except snuff to 16 cents per pound, and on snuff to 24 cents, being a reduction in the

same proportion.
Mr. Merrill (Rep., Vt.,) chairman of the Committee on Finance, said that he did not approve

of the sweeping reduction proposed for manufactured topacco and snuit. It was not only inexpedient to reduce this taxation, but it was a bar to granting any further relief from taxa-tion. All over the world tobacco had universally been recognized as a prominent article of taxation. We consumed every year more than 40 cigars and 2 pounds of tobacco for every man, woman and child in the country. To ain as much revenue at 16 cents per pound as at 24 cents, there must be an increase in con sumption of from one hundred and five mil lion pounds to one hundred and fifty-eight lion pounds annually and that would never

be.
The question being on concurring in the amendment proposed by the Committee on Finance, to tax suuff 24 cents per pound, it was disagreed to, yeas 14, nays 20, thus leaving the tax on snuff 16 cents per pound, as proposed by the House bill, the same rate of tax also being retained on tobacco.

also being retained on tobacco.

The Senate then voted on the amendments The Senate then voted on the amendments proposed by the committee and struck out the tax proposed on cigars and cigarettes, leaving the tax as under the existing law.

The House spent the day considering the arrears of pensions and passed the river and harbor appropriation blll by a vote of 173 to 78

THE LEGISLATURE.

Feb. 11.—Both Houses met last evening afher the week's recess, but little business of public interest was transacted. Governor Croswell sent to the Senate the following note, addressed to himself, and signed by Senator Christiancy:
"I hereby resign my office of Senator from

"I hereby resign my office of Senator from the state of Michigan, in the Congress of the United States, this resignation to take effect on the 10th day of February instant, at 12 o'clock at noon of that day."

A similar message was received in the House. This will bring the election of Senator Christiancy's successor on the 18th inst.

To-day the Senate passed the following bills none of which have yet passed the House, except that relating to justices' courts: To repeal the act for the collection of damages sustained by defective bridges on public highways; to prohibit the spearing or shooting of fish in Goguac Lake; to amend section 5295, Compiled Laws, relative to courts held by justices' biled Laws, relative to courts held by justices to amend sections 6774-6, relative to the replevin of beasts distrained; to amend section 7415, Compiled Laws, relative to justices courts; to amend section 5186, Compiled Laws relative to same subject; relating to meetings of the Superannuated Preachers' Aid Society of the Methodist Church; joint resolution for the relief of Hiram A. Sweet, publisher of the

Sturgis Journal.

In the House bills were introduced for the following purposes: For a stenographer for the Detroit Police Court; to repeal act 198 the Detroit Police Court; to repeat act 130, laws of 1877, for a tax upon dogs; providing for the punishment of indecent assaults; amending sec. 7324, Compiled Laws, relative to poor debtors; to provide for punishments of assaults with deadly weapons; to organize a school district in the town of Montmorency; to detach territory from Belknap, Presque Isle county; to organize the town of Metz; to regu-late the practice of medicine and surgery; for an appropriation of swamp lands for the bene-fit of Bay, Saginaw and Tuscola counties for drainage purposes; changing the name of "Goblerville" to "Atlantis;" amending the charter of Albion; authorizing the use of a part of the East Siginaw and Au Sable State

road for a plank road.

Feb. 12.—The Senate passed the following bills, the last two having already passed the House: To authorize counties to appoint

House: To authorize countries to appoint Registers of Probates; authorizing Au Sable to borrow money to build a bridge; to restore certain lands to market in Gratiet county.

The House passed the following, the first two having already passed the Senate: To incorporate the village of Edmore; to amend the law relative to blanks furnished by the Auditlaw relative to blanks furnished by the Adultor-General; to incorporate the village of Farwell; asking Congress for an appropriation for the improvement of Clinton River; to reduce the tolls on the Bay City, Vassar and Watrous-ville plank road; to authorize the Board of Supervisors of Bay county to receive certain lands from the Bay County Agricultural Solands from the Bay County Agricultural So ciety in trust for certain purposes; to appro-priate certain non-resident highway taxes to repair and finish the Caro and Wells State road; for an appropriation for the Cass River and Bay City State road; to constitute the village

of Ithaca an election ward.
Feb. 13—The Senate passed the following bills which have already passed the House: to authorize the warden of the State Psison to receive certain moneys due; to extend the time for the completion of the Marquette and Mackinac Railroad; to amend the charter of

Ishpeming.

The House passed the following bills, which have not yet passed the Senate: amending sections 5182-5184, Compiled Laws, relating to fees in appeals from circuit courts to the Su-preme Court; amending section 4834, Compiled

wards.
Senator Childs has introduced a bill for an appropriation to erect a fire-proof building for the museum at the University. The estimat-

Feb. 14.—The Senate passed the following bills, all but the second having already passed the House: Incorporating Farwell, immediate effect;

appropriating money for the use of the state Normal School, immediate effect; reincorporating Manchester, immediate effect.

The House passed the following, only the first two having passed the Senate: To extend the time for collecting state and county taxes in Detroit; to amend

the incorporation of mining companies to amend section 5977, Compiled Laws, relative to the return and summoning of jurors; to amend section 4402, Compiled Laws, relative to the appraisal of the estates of disceased persons; to amend section 7538, Compiled Laws, relative to punishment for misdemeanors; amending the law relative to school meet ors; amending the two relative to study ings; to provide for the better protection of property in the State Library; relative to the care of minor children in case of the separa-

care of minor emidren in case of the separa-tion of their parents.

Feb. 15.—In the Senate, a number of bills were introduced. Some time was spent in committee of the whole, and the following bills were passed:

House manuscript bill amending the law for the incorporation of mining companies.
Senate bill 39, to amend section 5266, Compiled Laws relative to justice courts.
In the House a number of petitions were

presented and numerous leaves of absence A long list of bills were introduced. The

concurrent resolution received from the Senate, extending the time for allowing extra compensation for the completion of the manual, was divided; the extension of time was agreed to, the extra compensation clause was

The following were read a third time and House joint resolution No. 7, in reference to

polygamy.

House bill No. 12, incorporating Brooklyn.
Senate joint resolution No. 4, for the payment of the claim of Hiram A. Sweet for printing the tax roll and making legal the publication, the same as if he had mailed copies of his paper as required by law.

Feb. 17 -In the Senate petitions were nted for the admission of girls to the Agri cultural College; for the admission of women to school offices; relative to appeals from just courts; for a separate institution for the ad. Numerous bills were introduced but

In the House several petitions and bills were introduced mostly of a local character. Senate bill 13, to amend the charter of Clinton, and House bill 126, to authorize the surveying and establishing of section corners of unsurveyed lands, were read a third time and pass-

Dr. Schliemann is ambitious to be

United States consul general at Athens.

He is an enthusiastic American, has fine palace in Athens. He is on good terms with the king, and would gladly give his services gratuitously, besides doing all he could for the United States in the various archæological explora-

tions now going on.

LANSING.

The Legislature Gets to Work in Earnest and Passes Several Important Measures-the Nomination for U.S. Senator--Prof Kedzie on Illuminating Oilsthe Agricultural College Opening-a Pleasant Social Event.

From Our Own Correspondent,

LANSING, February 14, 1879. The Legislature reassembled Monday evening, the members returning from their constituents with clearer ideas of the wants of the people, and thus prepared to act more promptly upon the measures brought before them. Several important bills have been passed and committee work has progressed this latter part of the week more rapidly than at any other time during the session.

THE U. S. SENATORSHIP.

On Saturday last Senator Christiancy placed his resignation in the hands of the Governor, and immediately upon the convening of the Senate, the Governor transmitted the letter of resignation to that body. A caucus of Republican members of the Legislature was thereupon called to meet Thursday evening in Representative Hall. The caucus met at the appointed time, the floor of the Hall being filled and a large audience appearing in the galleries.

The preliminary canvass disclosed the fact that but two names would be presented to the caucus—those of Hon. Z. Chandler and Hon. John J. Bagley. In the presentation of these names. and in the speeches in which the claims of each were supported, there was an absence of depreciation and inuendo, and a mutual recognition of character and services, very rare on such occasions. A regret seemed to be entertained, on the part of many of the legislators, that they could not vote for the two men. The strong points in the character of each were brought out; due credit was given for services rendered by each of the candidates to the State, the Country and the Party; and the contest ended, as it was conducted, with honor to all.

The state of affairs, as presented in national politics, seemed to have much to do with the selection. It was thought that when the solid South represents itself in Congress by the men who led the rebellion, the North must again send its old leaders; fighting men if need be; men who have the courage of their opinions and who will maintain them with vigor in the face of any opposition that may arise.

There was also mingled with this feeling a desire to re-endorse "Old Zach" and amend the record of the Legislature made four years ago. A good deal of quiet work was done in this way, long before the Legislature convened, in the primary caucusses and

in the conventions. With these things working in his favor, and the entire party machinery in his hands, it is not to be wondered at that he should secure a large majority. The first informal vote stood 69 for Chandler to 19 for Bagley and one complimentary vote for Senator Palmer of Detroit.

There will be no coalition of Republicans in opposition to the nomination. Mr. Bagley authorized the withdrawal of his name after the first informal ballot and the nomination was made unanimous, apparently without a feeling of dissent.

THE MARQUETTE AND MACKINAC RAIL-ROAD.

The Senate has passed the bill ex tending the time for completing the Marquette and Mackinac railroad. It had previously passed the House; the Governor has now signed it, and it has become a law. Seldom has so important a measure passed with so little discussion. There seemed to be a general recognition of the desirability of the road and of the value of the business interests it would promote, and this overruled the fear expressed in some quarters that the extension of time would keep the lands out of market and prevent development of the section through which the road will run. It is the understanding that the road will be built at an early day, if not by those who have had it in hand, by parties who stand ready to take hold of it and push it rapidly to completion.

PASSED THE COMITTEES.

A bill reported back from the Senate committee appropriates \$7,000 for each of the years 1879 and 1880, for the expenses of the fish commissioners. This is the same as the two previous years

The House bill for the Deaf, Dumb and Blind Institute appropriates \$41, 000 for each of the years 1879 and 1880 for general expenses, and \$6,600 each year for special expenses.

ILLUMINATING OILS.

A large number of petitions have been presented for a change in the law regulating the test of Kerosene oil. The law as it stands requires a flash test of 140 degrees and a rigid system of in spection. This, it is claimed, adds largely to the cost. It is also claimed that an oil of 120 degrees, as used in Ohio, would possess equal illuminating power and would be nearly as safe.

The experiments of Prof. Kedzie, of the Agricultural College and State Board of Health, have doubtless largely influenced legislation on this subject. The Professor does not champion any policy in the matter, except so far as the experiments and facts point to safety and warn of danger. Statistics show that since the present law has been enforced there have been very few accidents from the use of oil, whereas before the passage of the law, accidents were of frequent occurrence.

were of frequent occurrence.

Prof. Kedzie claims that it is not the purity of the oil with reference to the flash test that causes any great increase in the price. He himself uses an oil of 300 degrees, that will extinguish the fire of live coals when thrown upon them, and yet this oil costs him but 10 cts per gallon more than the oil commonly sold under the Michigan law. In Ohio the price of oil is about half what it is in Michigan;

\$\frac{\\$3}{50}\$; 194, av 94 lbs, at \\$4\$, and \\$10\$ added; 120, av 140 lbs, at \\$4\$ 55; 118, av 106 lbs, at \\$4\$ 50; 101, av 92 lbs, at \\$4\$ 25; 190, av 100 lbs, at \\$4\$ 45; 120, av 94 lbs, at \\$4\$ 25; 190, av 114 lbs, at \\$4\$ 25; 181, av 106 lbs, at \\$4\$ 45; 181, av 106 lbs, at \\$4\$ 45; 120, av 94 lbs, at \\$4\$ 25; 190, av 114 lbs, at \\$4\$ 35; 120, av 94 lbs, at \\$4\$ 25; 190, av 114 lbs, at \\$4\$ 45; 181, av 75; 181, av 75 lbs, at \\$4\$ 25; 190, av 114 lbs, at \\$4\$ 45; 181, av 106 lbs, at \\$4\$ 45; 190, av 114 lbs, at \\$4\$ 25; 190, av 114 lbs, at \\$4\$ 25; 181, av 106 lbs, at \\$4\$ 45; 18 married a Greek lady, and is building a an oil of 300 degrees, that will extin-

but that comes from the fact that there are only three refineries who put up the Michigan grade, and from the further fact that the low grades are more easily adulterated. The people and their representatives, looking at the nearly half a million dollars paid by them for the higher test, seem to be impressed with the idea that a lower est may be safe in careful hands, and it is not unlikely that the law may be amended. Prof. Kedzie wili deliver an address before the Legislature this evening, and will bring before them tests, experiments and facts, which cannot fail to give them clear ideas upon the subject.

THE AGRICULTURAL COLLEGE.

The Spring Term of the Agricultural College will begin Feb. 26th. Three lasses. Freshman, Sophomore and Senior, will run through the summer. There will be no Junior class till September, at the opening of the next College year. The indications now are that the attendance will be very full.

Application will be made to the Legislature, and through it, probably, to the U. S. Gov't, for the appointment of an officer, professor, or instructor in military drill and tactics. The law under which the College was organized provides for military instruction, and the good effect of such instruction, in other chools—the discipline, order and manly bearing it imparts—makes it highly desirable that it should be established as a part of the college course.

A BRILLIANT RECEPTION.

The most brilliant social event of the season at the State Capitol this winter was the reception at the residence of Hon. O. M. Barnes Wednesday evening. It was attended by nearly 500 persons, including the Governor and other State officers, many prominent men from other parts of the State, a number of friends from Mason, where Mr. B. formerly resided, and the best of Lansing society. The time chosen was an opportune one for a large gathering. It was the evening preceding the Senatorial caucus, and many prominent men had gathered to the capital to participate in and wilness the canvass. The members of the Legislature had just returned from their homes, and many brought their wives and daughters with them. The honors were done with an ease, grace and dignity which familiarity with good society alone could impart, and every guest seemed to enjoy with great delight the hospitalities and festivities of the occasion.

Prof. Lockyer thinks that human life on the plannete Mars may be very much like human life on the earth. Although the light can not be so bright, yet the organs of sight of the inhabitants may be so much more susceptible as to make their vision quite as good as ours. Probably the heat on Mars is less than on the earth, as the polar snows extend further toward the equator, but it is by no means in proportion to the lessened power of solar rays. Several remarkable seas are now definable in the southern hemispheres, where, as in the case of the southern hemispheres of the earth, water covers a much larger area than in the northern hemisphere. One of the sonthern seas of Mars is very like the Baltic in outline. Another sea near the equator is one thousand miles n length and about one hundred in breadth—a long, straggling body of water, pretty much the shape of the letter S laid on its back, stretching from east to west.

At the Michigan Central cattle yards on At the Michigan Central cattle yards on Monday 198 head of cattle were sold against 349 the week before. The following were the sales: Two extra steers, a 1600 fbs, at \$5 30; 2 do, av 1540 fbs, at \$5 7 choice do, av 1323 fbs, at \$4 50; 2 do helfers, av 1550 fbs, at \$4 25; 11 good butchers' steers, av 910 fbs, at \$3 50; 4 do, av 910 fbs, at \$3 50; 23 fair, mixed, do, av 967 fbs, at \$3 25; 4 do, av 830 fbs, at \$3; 1 bull, 1700 fbs, at \$3; 1 do, extra, 2040 fbs, at \$3 60.

The offerings of sheep numbered 5286 head, against 2559 head last week. This is the largest number ever received at these yards in one week since they were established. The market was active, and the largest portion of the receipts were disposed of. The following were the principal sales: 60 head, av 70 bs, at \$3 50; 194, av 94 bs, at \$4, and \$10 added; 196

SOILS.

AGRICULTURAL CHEMIS-TRY AS APPLIED TO MICHIGAN.

Paper Read by Prof. Kedzie Before the Bay City Institute.

Two years ago, says the Professor I had a glance at some of these Northern counties during a trip to attend a Farmers Institute at Traverse City. What I then saw awakened an earnest desire to know more. A soil that could bear such magnificent forests and could ripen apples so nicely colored, as if the yellow and red fingers of sunset had grasped the fruit and would not let go—surely such a region and such a sail were worthy of careful study. But the ground was all covered with snow, and all plans of study and investigation must be postponed to a more convenient season. But the desire and the purpose to know more of this section of the State did not die out, and last spring I entered upon the work in good earnest. My object was to direct public attention to the resources and capabilities of that por-tion of our State which had been overlooked too long for the best interests of the commonwealth.

I could not leave my work at the college to personally examine these new counties, and if I could I would thus satisfy myself instead of convincing others. If I could place before others an intelligent and just opinion in regard to the agricultural capabilities of these northern counties, I would do the public better service than by any amount of personal examination which could bear no better fruit than personal assertions in respect to this region. I preferred to merely bring the witnesses into court, to examine and crossexamine them there, and leave the public to be judge and jury in the case It seemed to me that I could best do this by gathering characteristic specimens of soil from as many representa tive points as possible, submit these to chemical analysis, examine the physica properties and characteristics of these soils, and then present the results of these investigations and the soils them-selves to the public and ask an enlightened public opinion to give a verdict in

CHEMICAL ANALYSIS OF SOILS.

the problems of agriculture, it was supposed that the greatest benfit which chemistry could impart to agriculture was to be derived from the analysis of the soil. It was supposed that the fertility of any soil, the kind of crop it was fitted to raise, or the material which must be added to the soil to develop its greatest productiveness, were each and all to be determined simply by a chemical analysis of the soil These extravagant anticipations have not been realized. It is found that chemical analysis will not always distinguish between a fruitful and an unfruitfal soil; because a soil may be unproductive for physical reasons, though it may contain all the chemical elements of fertility. The utter break-down of Liebig's mineral theory of manures when put to the test of experience rang the knell of mere soil analy-

But if chemical analysis failed when so much was demanded of it, we are not to go to the other extreme and his season; his leaf also shall not withconclude that because it is not good for everything it is good for nothing. Chemical analysis of the soil is of value in determining whether a soil is capable of fertility or the contrary; also in determining the degree of its possible fertility. There are certain elements which are absolutely necessary for plant growth. In the absence of any one of these vegetable growth is impossible; if the supply is relatively limited, plant growth will be limited correspondingly. If all the ash elements are present in sufficient amount and in available form, such soil is capable of fertility. Hence the chemical analysis of a soil is of importance in determining the possibility of fertility and of the relative fertility, which may be secured under favorable conditions.

THE ELEMENTS.

You are all familiar with sand, Silica and alumina, when chemically combined, form clay. Oxide of iron is the material which gives the reddish or brownish color to most soils. The distribution of the rain through the great bulk of nearly all soils is made months of the year, they would furnish up of sand, clay and oxide of iron. Alumina is never found in the ash of ing their agricultural capabilities; but cultivated plants; a certain amount of such statistics are almost entirely silica and oxide of iron is found in the wanting. ash of all plants; but the great mass of these materials, as found in the soil, is of tain moisture bears an important reno worth in the chemistry of plant life; lation to their fertility, because this they are the mechanical agents of the soil, and are of worth mainly from their relations to temperature and moisture and by giving mechanical support to the plants. Their chief office in the soil is physical, and not chemical. They render the soil light or heavy, porous or retentive. The organic matter of soils, besides furnishing a supply of combined nitrogen, is chiefly valuable for its physical relations to temperature, moisture and porosity of soils. Leaving out of account the mechani-

cal agents of the soil, which mainly influence the physical conditions of soils, there remain lime, magnesia, potash, soda, the sulphates and phosphates. While these substances make up the larger part of the ash of all cultivated They are necessary conditions of plant growth; in their absence no plant can grow; when they are present in very limited amount plant growth hold: one hundred parts of carbonate is correspondingly limited, but when they are present in sufficient quantity and in available form, if the physical conditions of the soil and the climate are favorable, any crop can be grown and brought to perfect maturity. They are the chemical agents of plant growth. In the entire absence of either lime or magnesia, or potash, or sulphates or phosphates, no plant can grow, much less mature its seed.

ASH ELEMENTS.

In studying the results of chemical analysis of the soil, we should fix our attention mainly upon these indispensable ash elements of plant growth. In the following table I omit the mechanical agents of the soil, and present only the sum of ash elements contained in

	one hundred parts of soil:	
	1. River Raisin bottom lands, cultivated	
	forty years	7.1
-	2. River Raisin bottom lands virgin soil.	7.5
	3. Burr-oak wheat land, saline	4.3
	4. Prairie soil, never plowed, Cass Co	4.9

27	Agricultural College, field No. 8	5
	Tawas Iosco county	3

29. Big Ripids, Mecosta county... 30. Sherman, Wexford county... 31. Elk Rapids, Antrim county... It we reject from the list the exceptionally rich bottom lands of the Raisin (1 and 2), and of the Tittibawassee (9). and the exceptionally poor land (10, 13, 15 and 24), taking the average of the burr-oak land of Washtenaw county and the prairie soils of Cass county as a basis of comparison (4.43) we find the means by which they could form that the average of all the rest of the soils in this list differs from this high standard of soil excellence by only 58 hundredths of one per cent. All the soils of this list (with the four exceptions) contain a large excess of ash elements beyond the requirements of any crop that may grow upon it. Soil No. 1 from River Raisin bottoms has been cultivated forty years without manure, vet in 1876 it produced \$3 bushels of shelled corn to the acre.

POTASH.

In the case of the four exceptional soils while the relative amount of ash materials seems small, the absolute amount to the acre is large. Take No. 10, which is the lowest in the list, having only 1.55 per cent of ash elements; ix your eye upon potash 54 and phosphoric acid 15 per cent., these substances being most important in the production of cereal crops; we find that an acre of this soil taken to the depth When chemistry was first applied to of 12 inches contains 10,800 pounds of potash and 4,000 pounds of phosphoric acid; yet 30 bushels of wheat remove less than 22 pounds of potash and 34 pounds of phosphoric acid. It will thus be seen that even the poorest of these soils cannot be called chemically barren, because they contain all the necessary ash elements of plants and in quantities sufficient to sustain remunerative crops. If they are unfruitful it must be because of unfavorable physical conditions or because the ash elements are not in an available form.

RELATION OF THE SOIL TO WATER. One prime condition of vegetable

growth is water. No matter what the hemical composition of a soil or what its physical properties, nothing can grow upon it in the absence of water. so controlling is its influence that the Bible often speaks of an unfailing supply of water as the leading condition of vegetable growth. "And he shall be like a tree planted by the rivers of water, that bringeth forth his fruit in whatsoever he doeth shall pre The "Great Sahara" is a desert not from any peculiarity of the soil but mainly from want of water. This imperative need of water to sustain vege table life is not confined to tropical regions but is felt through every zone of cultivation. Even where water is present in sufficient quantity to sustain life we find that fruitfulness is increased by abundant and well distributed rains. A dry year means short crops in temperate climates and famine in tropical climes.

The relations of the water of the soil to the production of crops may be considered under three heads. 1. The amount and distribution of rain. 2. Capacity of the soil to retain water. 3 The approach of the water line to the surface of the soil.

RAINFALLS.

If we could obtain statisticts of the amount of rainfall in these new counties and of the one very valuable means of determin-

The power of soils to take up and recapacity to imbibe and hold water is one very important condition of their withstanding the influence of prolonged absence of rain. Soils differ greatly from eachother in this respect; in the same district and under the same conditions in regard to rainfall we find that one soil will withstand the influence of dry weather and keep its crops green and vigorous, while the crops on a neighboring soil will be parched and burned under the same conditions of

weather. The capacity of soil to hold water is nfluenced both by its chemical composition and by the fineness of its divis-Humus, or the vegetable matter on. of the soil, will retain the most water. Clay and the oxide of iron found in soils stand next, while sand stands lowest on the list. The more finely a soil is divided, the more water it will af lime in the form or sand will only hold twenty-nine parts of water, but in the form of fine powder will hold eighty-five parts, or nearly three times as much as the coarse material.

I have examined these Michigan soils with reference to their capacity to hold water, regarding this as one very important criterion by which to probilities. I thus aim to make the soils so characteristic of the strong and en- made in my profession.

heit till they ceased to lose weight, all stones and roots were picked out and all lumps broken down, but the soil was not pulverized or reduced to a finer state of division than was found in their natural state. One hundred grammes of the soil were weighed out, placed in a tarred glass funnel, and water poured over the soil till it was completely wet, but the soil was not stirred or puddled in the least; it was allowed to stand till the water ceased to drop, when the weight was again determined: the increase in weight showed the amount of water one hundred parts of thoroughly air-dry soil would take up and hold. This shows the relative capacity of these soils to take up and hold under natural conditions the water which falls upon them in the form of rain or snow, and thus shows their relative resources against periods of impending drought. For list soil from "the pine barrens" of New Jersey, and from "the plains" of Kalkaska, Baldwin and Walton Junction:

3.94 3.26 3.12 5.33 2.76 1.76 3.56 WATER-HOLDING CAPACITY. Pine barrens of New Jersey " Kalkaska..... 3.03

COMMENTS.

It seems to me that such an exami, nation of soils with reference to their waterholding capacity is valuable be-cause we interfere so little with the natural condition of the soil—we only deprive it of its free water, let it drink up all it will hold and then determine its amount. The results are very instructive and significant. The soil of the sterile pine barrens of New Jersey stands lowest in this list, taking up only 25.60 per cent. of water; then follow in order "the plains" of Baldwin 29.20, or Walton Junction 30.40, Eden 32.40, Kalkaska 33.10, and Webber 35.30. These soils are characterized by a deficiency of organic matter except the soil of Kalkaska. On the other hand the soils in the whole list which contain the most organic matter also have the greatest capacity to hold water; for example the prairie soils of Cass county, and the River Raisin bottom lands, that will hold from 61 to 73 per cent. of water, contain from 7.50 to 2.30 per cent. of organic matter.

On looking over the thirty-one soils which have been analyzed, and comparing the mass of these northern part of the State in the matter of their

THE WATER LINE.

If we dig down in the ground we usually find a level in which water is present in such quantity that it will low into the hole. The highest level in the soil in which water will flow is called the water line. It is not a fixed level, but fluctuates with the season. Some call the surface of the water in a well the water line, but there may be levels above the well water which will afford flowing water, but not in sufficient quantity to permanently raise the level of water in the well, in which case the water line would obviously be above the water level in the well.

The physical condition of a soil will be greatly affected by fluctuations in the water line; when it comes very near the surface we have a swamp; when it is only one to two feet from the surface, coarse wild grasses or sedges predominate; when it is from four to ten feet from the surface we is to lower the water-line that the to be dwelt on here.

Plants derive most of their water that old-time virtue: Honesty. from the capillary water of the soilwater held by capillary attraction, that makes the soil moist, but will not flow out of the soil by the force of gravity. But it is found that most ment to this end being as follow: Withplants under favorable circumstances in a case, clockwork is fixed, which will send a few roots as water-feeders causes a large horizontal plate to rotate provide a supply when capillary water disk of paper is held by a spring, the for this provisional supply of water. It is obvious that the plant will be in the rate of travelling many be studied. a better condition when the water-line is within a moderate distance from the

DIVERSITY OF SOILS.

tell their own story, while I merely during soil of the north part of Eaton and south part of Ionia county. A soils were dried at 212 degrees Fahren-oil that naturally clothes itself with a strong sod of June grass or white clover. In other places, for example Lake and the eastern half of Mason county, (No. 11, 13 and 15) the soil is sandy and but little tendency is manifested to form a sod; the roadside of the railway was covered with creeping blackberry, like certain soil I have seen in some parts of Van Buren county In other places, as in Midland county No. 8) the soil is sandy but it turfs over easily where hay seed has been scattered. John Reardon of Coleman told me that he had cut four or five tons of hay last summer from last winter lumber roads these roads having been seeded by the hay drawn over them during last winter. No farmer need question the virtue of any soil that with instinctive modesty covers its nakedness with a robe of grass When I speak of grass I do not include the sedges like the "bunch-grass' purposes of comparison I include in this which usually grows upon very poor soil.

An Unfashionable Virtue.

St. Louis Republican.

Not long ago, in a neighboring city, one of the belles of society accepted the matrimonial proposition of a worthy young gentleman, and was asked by him to name the happy day. She consulted her parents—who had previously given their consent to the match—and a family council was held. The decision reached was curious, as well as characteristic of our country and age. The father and mother agreed that the social position of their daughter required a grand wedding. The father, however, announced that misfortunes in business had brought him to the verge of bankruptcy; that he was in fact preparing to make an assignment for the benefit of his creditors. To this the mother replied that a grand wedding being of primary importance, it must of course take precedence of the assignment, for pecuniary reasons easily understood. And it was so ordered. The marriage occurred amid a blaze of glory, duly chronicled in the newspapers, and a few days afterwards Mr. Smith's paper went to protest, and his creditors took possesson of his limited assets.

Not long ago, considerably nearer home, a fond husband informed his loving wife that his financial affairs were in that condition which indicates a speedy and disastrous collapse. The wife said little, but thought much. The result of her meditation was the next day she went down town and bought a seal-skin saque and a set of diamonds. She told a female neighbor, who knew of the impending calamity, that the sacque and diamonds "would last her a lifetime; that if she did not get them now she never would, and so she got them." The collapse came in due season, and it is hardly necessary to remark that the furrier and jeweler are whistling for their money.

These twin incidents are true. They

are only two of the many, equally true, that never find their way into the uncongenial and unwelcome atmosphere of print. They illustrate a rascally tendency which is doing more to unsettle the foundations of commercial confidence and destroy commercial honor than any other we know of. They indicate, indeed, that in some quarters of "the very highest respecta-bility," commercial honor is already counties with those in the southern dead and buried. Taken in connection with the familiar process known as capacity to hold water, we find no evidence brought out by this test, which show that paying one's debts and buyoreaking with a full pocket," they would lead us to question the agricul- ing nothing you do not expect to pay tural capabilities of the mass of soil in these counties. Compare these lands ionable. Our fathers—and a good with the wonderful wheat lands, the many of their sons hold the same views, burr-oak plains of Washtenaw county | we are glad to say—considered that a and you observe that only two out of man who would not strain every nerve the thirty-one specimens analyzed and make every sacrifice to pay his which fall below the burr-oak lands in honest debts was little better than a their capacity to imbibe and retain scoundrel; and that the man or woman who bought anything without expecting to pay for it was no better than a Yet, matters nowadays have come to such a pass that one can scarcely cross the streets of a great city without being splashed with mud from the carriage-wheels of elegant bankrupts, who ride, while the people they owe are obliged to walk. Persons ive in fine houses, wear fine clothes, and give fine entertainments, who if out of debt would be as poor as the poorest of their creditors. Fashionaole society encourages and patronizes this fashionable rascality. sin which fashionable society will never forgive is poverty—even though that poverty is the result of unflinch ing honesty. A prominent Boston merchant—an ex-Governor of Massa chusetts—has hanging in his countingroom a photographic portrait under which is written, "An Honest Man." The honest man thus honored had simply paid his debts in full, after having been compelled to compromise them at have the best conditions of fertility. It a heavy discount. The ex-Governor insisted that the hero of such a remarkfarmer resorts to tile-draining, the benefits of which are too well known en. So taken it was, and there it hangs -a sad commentary upon the rarity of

The swinging motion of railway cars is now ingeniously utilized as an indicato the free water in the soil in order to once in twelve hours. On the plate a is deficient; thus beets, turnips, and border being divided into hours and many kinds of trees will often throw minutes. The point of a pencil, which such quantities of roots into tile drains is attached to two springs and a penas to obstruct them entirely. It is dulum, plays on the paper. Caoutchouc often found that the roots of plants buffers below the box communicate the will extend to surprising depths to swinging of the car to the pendulum reach the water-line to secure the means so that the pencil makes a zigzag line round the paper; on removing the latter,

NEW YORK NOTES.

To-day is the eighty-ninth birthday f Mr. Peter Cooper, and his daughter, Mrs. Abram S. Hewitt, has issued cards for a reception to-night at her house in celebration of the event, where many a guest will have an opportunity of re-peating what Mr. Henry G. Stebbins, President of the old Arcadian Club, said five years ago, when Mr. Cooper met the club by invitation: "We commemorate the birthday of a citizen whom not only all New York, but all the country would unite with us in honoring were there any way by which our people could mingle their expressions with our own." That Mr. Steboins was entirely correct in this statement, and that five years have not done for Mr. Cooper what four years so often do for other distinguished men in this country, but have left his portrait as clean and pleasant to look as ever, was clearly proved -if indeed it needed proof—by the result of a *World* reporter's visit yesterday among many of the rich and the poor, the famous and the obscure inhabitants of this city. To mention the names of the people who have a good word, and nothing but good words, to speak of Peter Cooper would be to republish the list of New York's English-speaking population. And that even would not do it, for the stammering tongues of foreigners would tell if they could, the things that foreign eyes have read in foreign prints of Mr. Cooper's virtues. Many of them had read the interview of the previous day with the aged humanitarian. It is believed by Capt. Byrnes, of the

Fifteenth Precinct, that at last the

mystery of the robbery of the Manhattan Savings bank, at Bleecker street and Broadway, on Sunday morning the 27th of last October, is solved; that one of the burglars is in custody, that the others are known and identified, and that there is no longer any doubt about the ultimate arrest and conviction of them all. The prisoner who is in custody is "Johnny" Hope, son of "Jimmy" Hope, and he was arrested by Capt. Byrnes on Monday night as he was leaving the Theatre Comique. The burglary of the Manhattan Bank was the most audacious and successful that was ever committed in this country. It was planned months ahead by the most expert thieves, and carried out with every chance against capture or identification. One singular fact about the case is that, although none of the burglars were arrested until Monday night, it is claimed by the police that the right men were suspected within 24 hours after the robbery had been committed, and that they were constantly sought after, but they succeeded in evading arrest. After the robbery had occurred, Inspector Dilks, Inspector Murray, and Capt. Byrnes, of the Fifteenth Precinct, considered the situation thoroughly, and the matter was placed in Capt. Byrnes' hands, the bank being located in the precinct. Capt. Byrnes studied all the details of the affair that could be learned, and concluded that there were but six men in the country who could have "put up the job," and that whoever had put it up must have worked the principal part of it, viz., tearing off the heavy safe door from the outside with a jim my and ratchet. This was done within 30 minutes, and it would be difficult to convince any well-informed detective that there are more than six burglars living who could have done it. When this conclusion was reached, the next thing to do was to locate each of the six probable men during the hours in which the robbery had occurred. One by one they were placed until five of them were accounted for elsewhere. The other could not be place picion fastened upon him. That was Jimmy Hope, partner of such men as Jim Brady and the equal of them at bank robberies. When he was singled out, evidence was carefully sought and firmed the suspicion against him.

The ashes of prominent men may now repose in peace for the Legislature has passed a bill designed to prevent such desecrations of graves that of the late A. T. Stewart, which shocked the community last fall. The Senate gave its approval to-day to the bill introduced by Mr. Fish in the Assembly on this subject. It is entitled 'Of offences against public decency,' and is as follows:

Every person who removes the dead body of a human being, or any part thereof, from a grave, vault, or other place where the same has been buried, or from the place where the body has been deposited while awaiting burial, without authority of law, with intent to sell the same, or for the purpose of dissection, or for the purpose of procuring a reward for the return of the same, or from malice or wantonness, shall be deemed guilty of a felony, and on conviction thereof shall be punished by imprisonment in the State Prison for a term of not more than five years.

The Kentucky thoroughbred horses are still performing at the Aquarium. Mr. Oscar has them under complete purchased a license for himself and a control, and they appear in a number young lady whom he had previously of odd and difficult performances daily, engaged himself to, and was married. among which is the representation of The widow made him surrender the Norma as Madame Angot. The animal clothes.

goes into the ring dressed in a skirt and cap, and dances. A new feature in the entertainment is the introduction of two baby hippopotamuses by their trainer, O. Kohn. These animals were captured in February, 1878, by Charles Reiche, then on an expedition to Abssinia.

The entertainment ends with a representation of Little Red Riding Hood, under the direction of Mr. and Mrs. Oscar. The story of Red Riding Hood is followed in the play, with the addition of a deer hunt and a reception of distinguished guests. Children personate the rulers of European coun-

The walking mania still rages. Lulu Loomer, who is walking in the Brewster building, finished her 315th quarter mile last evening at 9 35 o'clock having walked it in 4m. 35s. She appears to be in a better condition than on Monday and does not seem to suffer so much from lameness. Fred. W. Ritschy and James L. McCahill, of Company G, Seventy-first Regiment, will on Saturday evening start on a forced march of six hours for a gold medal and the championship. Annie Bartell will start again this evening on her 3,000 quarter-mile walk. Miss Andrews is to start on Monday. Mr. J. C. Carey, better known in Wall street as "Crosstown" Carey, has offered Miss Bartell's manager the privilege of putting flags and advertisements on the Fourteenth street horsecars free of charge.

It is anticipated that the warm rain of yesterday will break up the ice in the upper Hudson River, and that annoyance and interruption to navigation will follow. The ice is said to be solid, with very little snow ice mixed with it, and to average more than a foot in thickness. The ice which broke up in the early part of the season, it is said, was blown over to the western shore of the Hudson, and in many places is piled up ten feet in height.
If the ice should break suddenly as far as Poughkeepsie, it is believed that there will be larger fields than have been seen in the river for many years.

The vast ice-field which has filled the Horseshoe for over a month, preventing communication with the New-Jersey Southern Railroad dock, and closing the mouth of Shrewsbury River, has been moving away gradually for the past few days. On Monday night the ice caaried away part of the south dock of the railroad company, forcing the schooner Gordon Wooley into the wharf, and carrying away her bowsprit. The schooner George Hulme was driven on the beach, and received slight damage. The schooner Martha E. Price was carried out with the ice. but was brought to the railroad wharf in safety. The ice last night was moving slowly northward.

There was a large number of spectators in the City Court-room, Brooklyn, yesterday, where the second trial of C. J. Gelston's suit against the Tabernacle was in progress, but the trial itself proved to be very uninteresting. Mr. Talmage sat there with closely buttoned coat, seeming to be bored by the proceedings. Nelson Hamblin testified that at that meeting which raised Mr. Talmage's salary a resolution was adopted that the salary be fixed at \$12,000, and the time when it should begin at that amount was left to the pastor's discretion.

County Judge Armstrong, of Queens County, upon the petition of Mrs. Stewart, the widow of Alexander T. Stewart, last week, issued a summons requiring the Long Island Railroad Company, and Thomas R. Sharpe, the receiver, to show cause yesterday morning, at 10 o'clock, at the Judge's Chamber in Jamacia, L. L. why they should not be ejected from the possession of the Central, otherwise known as the Stewart Railroad, on account of the failure to pay rent. The amount alleged to be due was \$80,000.

The Stewart Road, it is understood, was leased by the Poppenhusens for a term of ninety-nine years. Only part of the road, however, was built by Mr. Stewart—a continuation of the original Central Road from Hinsdale, or Creedmore, to Babylon. This part of the road has not the appointment of manently abandoned it. ly Counsellor E. B. Hinsdale, who appeared yesterday for the company and the receiver, did not interpose objecname and age-eighty-four tion to the summons, and Judge Arm-Stewart, or her legal representatives in

ball on the ice at Gilmore's Garden tonight. A large number of the persons have signified their intention of appearing in costume. This will be the last week in which skating will be practicable on this piece of artificiallymade ice, as it must be removed to make room for the elaborate prepara-

WITZ.

All the great temples of Egypt that have withstood the destructive tendencies of time and the assaults of man for 4,000 years are of hewn stone. But the only wood in or about them is in the form of ties, holding the end of one stone to another on its upper surface. When two blocks were laid in place, then it appears that an excavation about an inch deep was made in each block, into which an hour-glass-shaped tie was driven. It is therefore very difficult to force any stone from its position. The ties appear to have been the tamarisk, or chittim wood, a sacred tree in ancient Egypt, and now very rarely found in the valley of the Nile Those dovetail ties are just as sound now as on the day of their insertion.

A Tennesse widow bought a suit of clothes for a young man, with the understanding that he should marry her, but he hastened to his own county and

THE COMMERCIAL.

Free to Do Right-To Do Wrong, Never.

SATURDAY, Feb. 22, 1879.

REPUBLICAN STATE CONVENTION.

A Republican State Convention to nominate one Ju tice of the Supreme Court in place of the Hon. fames V. Cambell, and two Regents of the State University in place of Claudius B. Grant and Charles Rynd, will be held at the Opera House in the city of LANSING, THURSDAY, MARCH 6, 1879, at 12 o'clock

In accordance with a resolution adopted at Grand Rapids, May 10, 1876, every county is entitled to one delegate for each 500 of the total vote cast for Governor at the last State election (in 1878) and one additional delegate for every fraction of 300 votes, but each organized county will be entitled to one del-

Under a resolution of 1858 no delegate will be entitled to a seat who does not reside in the county he

In a recent speech, Ben Butler said that he could see no reason why a Confederate soldier should not draw a pension, and announced that under certain conditions he would favor the granting of such pensions. Score another brick shied at the head of riages of wealth, and glide languidly through our crowded drawing rooms. If disease the Rebel Brigadiers!

Mr. Chandler has called the Republican State Convention to be held in Lansing on Thursday, March 5, at 12 o'clock noon. The Republican party must expect to meet the Beal faction in the Convention as he intends to secure men pledged to his interests if possible. It would be a sad day for the University if he should succeed in all his The people should know this fact before they are caught in Beal's trap; and the Republican journals throughout the State should at least announce it, eyen if they do not boldly denounce it.—Coldwater

THE NEW REGENTS.

cite I throughout the State the indignation it deserves. It is well known who is to blame for the action, and there is a growing determination to wrest the control of the University from a man who is at present the let. power behind the throne. That determination will manifest itself in the next selection of Regents. If the Republican party has any hope of electing its candidates, those candidates must be known to be men who have at heart the good of the University rather than their own political advancement. If the Republican party shall fail, at the coming State convention, to nominate such men, it will receive, and it will deserve defeat.

In all probability neither of the out going Regents will be a candidate for re-electypes, etc. in the selection of the new candidates. The first qualification should be that the nominees are graduates of the University. The list of Michigan University alumni is long enough to furnish many a name that stands for intellectual vigor and uncompromising integrity, and it is time that an unwritten law to the effect that only graduates should be eligible to nomination, was observed by both parties. Certain it is that the fact of being an alumnus is a most effective barrier against such assaults as a Regent is called upon to withstand. The other qualification is a character that has been long enough before the people to make plain the fact of its integrity. It is needless to say that men of pronounced political aspirations should not apply.

It is easy enough to say that a State convention ought to do thus and so, thereby casting the responsibility on to the snoulders of others. The burden, however, is not to be so easily shifted. It is the duty of the county convention to send delegates who will nominate true men at the State convention, and it is the duty of city and town conventions to send the right sort of men to the county convention; and especially it is every man's duty to see that the delegates to without compromise the principles for which he himself is contending. Usually a city convention is made up chiefly of men whose only occupation in life seems to be to kill time. With such men any nomination is a good one, and the active politician has little difficulty in obtaining any end he seeks. At the next city convention tet the ty is suffering disgrace, and that the politics of the State are in danger of falling into the hands of selfish, scheming men-in a word, let all good Republican citizens see our educational institutions, and governedies are used to cure catarrh, rheumatism,
dyspepsia, diseases of females, of kidneys, ment of the people, by the people, and for dyspepsia, diseases of liver, eye, ear, etc., etc.

Guard Hall was as enthusiastic as could be desired, and each of Miss Couthoui's numbers met with deserved applause, encores being insisted upon in two instances. Her dramatic power was plainly evident in every selection; the more effectively because of the entire naturalness and truth of her impersonations and the complete absence of rant and over-doing, so often seen upon the elocutionary stage. Miss Couthoui has great aptness and fidelity in her imitations of children and old people, and though there are some slight points of good taste in which she might improve, a longer study and experience will, without doubt, correct and make her recitations still more perfect iny as they have not before been introthan at present. Should it prove true, as has been rumored, that the Mission Circle will again engage her for an evening, on her way to fill an engagement in Detroit, she will doubtless be as enthusiastically received as before. The interspersed music was ac ceptable to the audience. Misses Barr and Joslin gave Mendelssohn's "Autumn Song" with much sweetness and grace, and Mr. Wm. Kimball sang an air of Mozart's, which was well received, while Mrs. Moore was prevented from singing by severe hoarse-

FROM SALINE. - Scarlet fever has just commenced in Saline. Eugene Versellius died last night after an illness of about for-ty hours. The doctors are trying to get the advantage of the disease.

C. Hauser, an old citizen of Saline, lies very low with Bright's disease. Ed. Weinell and J. La Rue started for Texas on Saturday last, with five oar loads

FASHIONABLE FOOLISHNESS, There is no modern fashionable notion

quite so absurd as the generally received idea that to be beautiful and attractive a woman must possess a wan, spiriteulle face and a fig-ure of sylph-like proportions—a fragility in nine cases out of ten the result of disease. By many fashionable belles it is considered special compliment to be spoken of as a special compliment to be spoken of as frail and delicate. They forget that the naturally delicate face and petite figure are very different from the pale and disease-stricken faces that meet us in the city thoroughfares, look out from the luxuriant carour crowded drawing rooms. If disease were unfashionable, as it ought to be, not a lady in the land but would take every possi-ble precaution to secure the fresh, blooming face and well rounded figure that only health can give. Ladies should remember that much as gentlemen may profess to admire the face and form paled and emaciated by disease, when they choose a wife they prefer a blooming, healthful, buoyant-spirited woman. Dr. Pierce's Favorite Prescription is the acknowledged standard remedy for female diseases and weaknesses. It has the two-fold advantage of curing the local disease and imparting a vigorous tone to the whole system. It is sold by druggists.

AN AUTHORITY ON BLACK EYE.—Harry
Hill, the famous "Sport," is said to know
more about black eyes than the brightest
brunette in America. He has given and
taken thousands in his time, and he says
that the only thing which will remove them
within twelve hours is Giles' Liniment Io-
dide of Ammonia.

The Cooley Creamer.

ED. COMMERCIAL. - Having as I think ful-

ly tested the Cooley Process, of cream raising and butter-making, which I began experimenting with in October last, I desire to call the attention of all who are inter ested in the dairy business to the great utilested in the dairy business to the great utility of this the age—destined to have a place in every well regulated dairy in the country. The fact that cream may be raised in twelve hours, all of it, and the very little space occupied in setting the milk, also that more butter and a very much better quality is produced, are facts which the public at large are interested in, and rightly so. The constant labor criping from setting milk in pans is all arising from setting milk in pans is all saved. This of itself ought to recommend it to the attention of every farmer's wife in the country. I would be glad to awaken an interest in this invention until every household in the land may reap the benefit of this wonderful labor-saving process of the very loase. Headquarters for Lamps, Chandeliers, Oil, Etc. Gas Fixtures of all kinds at bargains. Student Lamps of several kinds telling facts are these, in confirmation of what is claimed for this invention. The HIGGINS SWEEPSTAKES PREMIUM OF \$250.00 Halls a specialty. New designs and novel-given for the best butter made by any fac-tory or dairy in the United States, was sumers can save gas by using our patent awarded to Hiram Smith of Sheboygan, at the International Dairy Fair, Dec. 18, 1878, for butter made by the Cooley process. There were eighty packages to contend with, and Mr. Smith felt the test to be a severe one. He asserts that it was made strictly after the Cooley system,—in no case the milk standing longer than between milkings,—and he adds, "In no case would I go back to the old system of buttermaking; I could not afford the increased labor and accept the decreased price that labor, and accept the decreased price that common dairy butter sells for." At the same Fair, John S. Murray, Delhi, N. Y., was awarded the First Premium of \$125.00 for the best butter made in New York State. This butter was also by made the Cooley pro-cess. Samples of the butter made in June were on exhibition in fine condition, show ing there is no question as to its keeping qualities. The Cooley Creamer, will pay for itself every sixty day, summer and winter,

A REMARKABLE FACT.

It makes no difference how many Physicians, or how much medicine you have tried, it is now an established fact that German Syrup is the only remedy which has given complete satisfaction in severe coses of Lung Diseases. It is true there are yet thousands of persons who are predisposed to Throat and Lung affections. Consumption, Hemorrhages, Asthma, Severe Colds settled on the breast, Pneumonia, Whooping Cough, &c., who have no personal knowledge of Boscnee's German Syrup. To such we would say that 50,000 dozen were sold last year without one complaint. Consumptives try just one bottle. Regular size 75 cents. Sold by all Druggists in America.

BUCKLEN'S ARNICA SALVE.

The Best Salve in the world for cuts, Bruises, Sores, Ulcers, Salt Rheum, Tette, Chapped Hands, Chilblains, Corns, and all kinds of Skin Eruptions. This Salve is guaranteed to give perfect Satisfaction in every case or money refunded. Price 25 Cents per Box. For Sale by Frank Smith,

A WONDERFUL DISCOVERY.

For the speedy cure of Consumption and all diseases that lead to it, such as stubborn Coughs, neglected Colds, Bronchitis, Hay Fever, Ashthma, pain in the side and chest, dry hacking cough, tickling in the throat, Hoarseness, Sore Throat and all chronic or lingering diseases of the throat and lungs. Dr. King's New Discovery has no equal and has established for itself a world equal and has established for tasent a world wide reputation. Many leading physicians recommend and use it in their practice. The formula from which it is prepared is highly recommended by all medical journals. The clergy and the press have complimented it in the most glowing terms. Go

CONSUMPTION CURED.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure for Consumption, Bronchitis, Catarrh, Asthma, and all Throat and Lung Affections, also a positive and radical cure for Nervoas Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, will send free of charge to all who desire it, this recipe, with full directions for preparing and using, in German, French, or English. Sent by mail by addressing with stamp, naming this paper, W. W. Sherar, 149 Powers' Block, Rochester, N. Y. 768-6m E. O W

"Ilium fuil." And the Rev. Geo. Duffield, D. D., is the *llium."

An old physician, retired from practice, having had placed in his hands by an East India phase leads of these things ask, with considerable show of reason, where is the harm? What is the harm? What is the common painted on them, which are considered allowable, or what the difference between the common painted on them, which are considered allowable, or what the difference in the game when chance and skill have place in both? Is not denie may be a place in both? Is not denie may be a place in both? Is not denie may be a place in both? Is not denie may be a place in both? Is not denie may be a place in both? Is not denie may be a place in the evils of which is almost the difference between a good moral play (and of course we would not advocate any other) and a concert or an opera, or an elecution are retrainment? We cannot deny that the play has been made the means of setting forth truth, even Bible truth; that the dance has been used in the service of God; that if we condemn cards as sinful in themselves, we must either condemn every similar amuse-ment, or show ourselves to be grossly inconsistent. I think we must admit that the

POPULAR AMUSEMENTS.

SERMON PREACHED BY THE REV. JOHN M. RICHMOND, IN THE PRESBYTERIAN CHURCH, SUNDAY EVE'NG, FEB. 9, 1879.

ECCLES. 11:9—Rejoice, O young man, in thy youth; and let thy heart cheer thee in the days of thy youth, and walk in the ways of thy heart, and in the sight of thine eyes; but know thou, that for all these things God will bring thee into judgment.

I have been requested to speak on the Thave been requested to speak of the subject of popular amusements. This request has been repeatedly urged, and comes not from one source only but from many From those who desire to be guided aright in this matter, as well as from those who have seen the evil results to which amusements sometimes lead, and who feel the need of the pulpit raising its voice to warn the statement to of the dangers. I make this statement to show that in speaking of this subject to-night I am not alone in feeling its importance and the great need of something being done to warn the unwary of the snares which are spread under the garb of inno-cent anusements, and to check the worldly tendencies of the church. I have hesitated

The subject is a difficult one to treat suc-

cessfully;
1st. Because of that at which I have hinted. Men are slow to believe if they do not want to. They are slow to accept the plain-est principles of truth and right living if est principles of truth and right living II they do not exactly accord with their wishes. They cling to their views and habits, and hug closely their bosom sins. Hence the tendency to misinterpret and misapply the plainest teachings of Bible principles which mark the path of duty.

2d. Because in the Bible we find no direct teachings of the plainest truth and the path of the plainest truth and the path of the plainest truth and plainest truth and

rect teaching on this subject. There are subjects upon which the Bible utters direct and emphatic declarations; such as "Thou shall not kill," "Thou shall not steal," "Swear not at all;" but as to what amusements are innocent and what are sinful, the Bible gives us no direct command, or as to when an innocent amusement becomes sinful we have no "Thus saith the Lord," "Thus far shalt thou go and no farther."
In these things we must be guided by inference from Scripture, by reason, by the enlightened Christian conscience, and by

common sense. 3d. Because the minister of the Gospel

> every man is held personally responsible, men, in no way relieves another of respon-sibility. If one man goes and hangs him-

many more which might properly come un-

ing, card-playing and theatre-going are amusements in which many indulge who stand high in society and in some cases in the day of the desired than that; we do not stand over him later than that; we do not stand over him later than that; we do not stand over him later than that; we do not stand over him later than that; we do not stand over him later than that;

amusements, if evil there be, does not necssarily attach to them, but arises from the use, or abuse, of them. Then the question arises, can we find any amusements, or anything else, that have not been abused or to have been wrecked and to have launched their living and the vile; some have associations which render them exceedingly objectionable. The seamen avoid, if possible, the rocks and shoals where vessels are known to have been wrecked and to have launched their living anytons at once into a water of the control of the c thing else, that have not been abused or made an evil of, or that is incapable of such abuse? This is a question which is not a flippant one, for if we shut down on certain amusements, we must be prepared to offer something else as substitutes. Where, then, will we find anything which may not be made as productive of evil as any of these? Apparently there is nothing more innocent than the spotted card. Dancing is an old ise of their age, have made shipwreck of Apparently there is nothing more innocent than the spotted card. Dancing is an old and time honored institution; I know not what could take its place. I once heard, on the floor of the Presbytery, a man say, in condemning dancing, that he enjoyed getting down on the floor and rolling and romping with his children What a scene his mode of amusing himself would present in company! No more ridiculous, however, than the idea of suggesting such a thing in company! No more ridiculous, however, than the idea of suggesting such a thing as a substitute for dancing.

thine eyes; but know thou that for all these things God will bring thee into judgment. Some concluding remarks, or inferences

as a substitute for danoing.

But still the question presses us. We must either secure fitting substitutes, or else do away with amusements altogether, view, I have given that which ought to which I fear would be the greatest evil of guide you, and also that which is most honorall. No matter how studious the young ing to free, moral, intelligent, accountable man may be, he cannot study all the time. chism, He must have amusements and will have it. A writer has said: "Whatever some divines and moralists of a coverage of the control of the to take up this subject heretofore, as a distinct theme, because my observation has led me to fear that little good may be accomplished by so doing. It is usually a popular subject, and it has appeared to me to be so because men are more anxious to gerous to salvation, this much I, think, may be asserted with truth upon the most canascertain how far religious teaching can be made to excuse their practices and indul-did and rational state of the case, that gences, that they are to be guided aright. Although I have not specially treated of this subject, I have in my endeavors to declare "the whole counsel of God" laid down again and again the principles which must cride every man who will do night in this contract the armony and continuance of cultivated society, play, considered merely as an amusement or relaxation, or pursued as an amusement or relaxation, or pursued as an amusement or relaxation. degree necessary to the human mind, as gaged in them in a prayerful spirit? How well as to the harmony and continuance of many of those who habitually frequent the cultivated society, play, considered merely dance, the theatre, or the card table are as an amusement or relaxation, or pursued prayerful? again and again the principles which must guide every man who will do right in this matter. So that I have nothing new to offer—no new gospel to preach—nothing but what I have told you a hundred times before. I can only emphasize what I have told you often.

The subject is a different total transfer of the subject is a different total transfer. of mankind to condemn them in the gross; nor can any sufficient cause of censure, in my judgment, be urged, if they be limited as above; nay, if so limited, it is unques-tionable that they may be made the occasion of showing, without ostentation, nobleness of sentiment, justness of understanding, politeness of manners and evenness of tem-This passage, taken from Dr. Todd's lecture to young men, I consider a sober, safe judgment. Amusements are not only necessary, but within certain limits desira-

We cannot well give up all amusements,

what then shall we have?

Reading—but people cannot read all the time, and will not if they can. This, too, might become an evil. People may read too much. Many do, considering what they read. Then all do not enjoy reading. We must not limit all to one mode of entertainment.

Conversation—there is not one in a hundred whose conversation is worth listening to as an entertainment for more than twen ty minutes at a time. Then there may be more mischief done in an hour with the tongue, than all the mute card players, playing simply for amusement could do in a

People should go to church instead of the dance or play—It is true, people should by no means neglect their religious duties. Yet the one is not a substitute for the other, nor neglect the property of the chery. The need the one interfere with the other. devout worshipper may not find in worship all the recreation he needs. He needs to worship, but he may need relaxation besides not found in the house of God. And here again, going to church may be abused. Many attend upon the services of God's

SPEECHES

Of the Candidates at the Republican Senatorial Caucus.

Mr. Chandler said:

Mr. PRESIDENT AND GENTLEMEN OF THE CONVENTION: For the high honor which you have this night conferred upon me, in making me your choice to represent you in the Senate of the United States, you have my most profound thanks and gratitude. Words fail to express the emotions of my heart. And yet, gentlemen, I do not attribute this token of your regard to anything personal in myself, but rather to the principles that I have had the honor to advocate, in common with yourselves, during the last two decades. I am not here, gentleman of the convention and Mr. Chairman, to apologize for or to explain anything that I have ever said or ever done in a public ca-[Applause.] My record is made, and there it stands open to the world; and this I say—this I have a right to say—that never, during the whole of my political career in the Senate of the United States, have I uttered a setiment or cast a vote that I would alter, explain or change in any regard. [Applause.] We are all liable to err, and I, with others, undoubtedly erred: but I will say this, in my own vindication, that never have I cast a vote, and never have I uttered a sentiment in the halls of the Senate that I would not to-morrow cast and utter under similar and exactly the same circumstances.

Mr. Chairman, it may be proper, and I may say highly proper, that I should make a very brief review of the events with which, in the past, we have been connected. The Republican party, to which we all belong, and which we all love, revere and reverence, was born in Michigan nearly a quarter of a century ago. I saw the birth of the infant and was present at its baptism. It was an infant derided by its Demoeratic opponents, and derided by fossils of the old Whig party, then defunct. It was a party with one idea, substantially, when first it was born, and that idea was an idea that covered a continent. It was that the vast territories of these United States, large enough to create 10 empires in Europe, should be forever devoted to freedom, freemen, free thought, free speech and the free ex-ercise of republican institutions. This party grew until in 1857 the onslaught became fearful and dreadful. It was fought in the Congress of the United States. When I entered that body there were 20 Republicans to 44 Demoerats-and may their names ever be revered-stood with those Republicans for free territories—Douglass of Illinois, Broderick, of California, and our own Chas. E. Stuart, of Michigan. They fought with us, shoulder to shoulder, till that contest was ended and victory perched upon the banners of

Anon the years rolled on, and, in 1860, the lamented and revered Abraham Lincoln was selected President of the United States, and again the hydra-headed monster, slavery, raised its head and proclaimed that no man who freedom and hated slavery should be inaugurated President of the war that ever cursed the earth. The nation was ill-prepared for the war. Her forces were scattered all over the vast territories of the United States and her fleets were scattered wherever the winds of Heaven blow and water is found. Her credit was ruined, her arms destroyed or scattered or given to the enemy. We were in no condition whatever to enter into that contest; and there is where the Republican party grappled with the monster, grappled in deadly struggle for life. The nation poured out its blood like water that the nation might live. Her people offered themselves by the thousands, and hundreds of thousands, aye, by millions, and the great question was, how shall these men be fed and clothed, and the munitions of war furnished, to carry that fearful strife on. The wealth of the land was poured at our feet till there was no more wealth to pour, and, in the progress of time, we found that we were in debt some forty or fifty millions of dellars. Our soldiers were in arrears of pay for many months and not one single dollar in the treasury to meet immediate demands. And then the government, in the extremity, appealed to the nation whether or no the war should cease, and the national life cease, or and its flag. They said: "We have no money. Will you trust us for the necessary supplies to carry on this war? Will you give us provisions to feed your soldiers in the field."

Lappiause.] As I have said, I ran that campaign to a certain extent. I was chairman of the committee, and they howled fraud, fraud! There was fraud, but on the other side. Now I wish to say ake our obligations that we will pay as soon as we are able to pay? And, with one voice, from one end of the land, to the other, came up the response: "Take all we have, give us your obligations, and we will trust you. Carry on the war, and save the nation!" And we did carry on the war to a successful issue, and we did save

During the war we had no friends on earth. All the governments of the earth desired and earnestly prayed that our national life might cease, and little Switzerland alone was with us in our fearful struggle. We had neither friends nor allies elsewhere on earth, but we conquered; and after we had conquered, the nations of the earth said: "These men will fight; they have shown that they will fight; they have shown it in the Mexican war, and in the present war; but they will never pay their debts. Men who vote taxes following you have heard repudiation Senate and House—but what I do will get it by acclamation and a rising talked all over all the land. But the mean to say is that the rebels are a vote of the entire continent.

Republican party and the War Demo crats came up as one man and put their feet upon repudiation in any and every form. [Applause.] Your bonds were selling in 1865, and bringing 6 per cent. principal and interest payable in coin, for 60 cents on the dollar. But gradually they advanced till your six per cent. bonds were above par, and you issued five per cents; and the five per cents have come above par, and then you issued four and a half per cents; and your four and a halfs came above par, and then you issued four per cents and you have gone on till to-day the credit of the United States of America stands higher than the credit of any other nation on the face of God's earth-[applause -thanks to the honor and faith of the Republican party of these United States. You have shown to the world that the national honor is as dear to you as the national life, and so the world to-day understands it.

And yet, notwithstanding all this, notwithstanding all that you have done it is said by some that your mission is ended, and that the Republican party ought to die. Why ought the Repub-lican party to die? [applause]—a party that took your nation when it was in the very depths of humiliation, when your credit did not exist, when your bonds bearing 6 per cent. interest payable in one year, principal and interest in coin, were held for 87 cents on the dollar; and now the Republican party has raised it until your 4 per cent. bonds, running 30 years, are caught up to-day at the rate of \$8,000,000 a day, and very soon there will be no 6 per cent. oonds out, and no 5 per cents. and no 4½ per cents, and you will have your whole national debt funded into 4 per cents, and the credit of this government stands higher, as I have said, than the credit of any other government on earth. Yet, you ought to die Why, fellow citizens, the Republican party has accomplished more, in the short quarter of a century of its exstence, than any other political party that ever existed on earth in 10 centuries. [Applause.] You have not only saved from the blighting curse of sla very all those vast territories, but you have abolished slavery throughout your whole land. You have fulfilled every pledge ever given to the people of the United States, and I defy the worst enemy of the Republican party to name a single unfulfilled pledge today it ever gave. The last pledge ever given, that pledge that was given by you when in extremities, when you asked the nation to trust you and pledged your fortunes and your sacred honor that at the very moment when you were able you would pay this vast debt in the coin of the realm, on the first day of January, 1879, you fulfilled that pledge! [Applause.] What is more, it came to stay. [Applause.]

Now, fellow-citizens, the Republican

party has no idea of dying. It has made other arrangements. [Great laughter and applause.] Its record is too good; it has accomplished too much. The mission of the Republican party is not ended. It will not be ended un-til the rights of every man, the rights of every American citizen, shall be respected upon every inch of territory of these United States [applause], until you and I can go to South Carolina, go to Mississppi, go to Louisiana, and utter our sentiments as freely and as safely, and cast our votes as peaceably as quitely as the rebels can utter their sentiments here, and cast their votes in peace and quiet.

One thing more, fellow-citizens. I deny, and all the oaths of all the men United States. The people ordained that he should be President of the a rebel is better than a loyal man. United States, and the war broke out [Applause.] And yet to-day there are General Government ought, and the —a war more terrible than any civil 36 members of the House of Represen-General Government ought to see that tatives in Washington, representing no any law, any state act, in subversion of constituency whatever, in violation of law. To-day a rebel soldier in South Carolina casts a vote worth just twoand-a-half of the votes of a Union soldier in the Union army to the close of the war. [Applause.] The white population is less than the black by about that ratio. And yet the black man is as absolutely disfranchised as though he were the resident of another sphere, and the law says that where any class are disfranchised they shall not be represented on the floor of Congress; and yet there they are. The rebel who fought against the flag counts more than two loyal men who fought for your flag among our Michigan troops during the war of the rebellion. This state of things ought not to be, must not and shall not be. [Applause.]

Fellow citizens, a great deal has een said about fraud. [Laughter.] I been said about fraud. suppose you have heard the term fraud, fraud! I had the honor of having a little something to do with the election of 1876. [Laughter and applause.] It was an election on one side of fraud and violence; and without any exception, and I say it deliberately and after mature consideration, that the greatest fraud, in my judgment, that ever was seen on the earth was Samuel J. Tilwhether the people of this great land | den. [Applause.] As I have said, I said over and over again, that I never did a thing, wrote a line, sent a dispatch, either cipher or in the English language or in any other way, that I would not be glad to see in print tomorrow morning in all the Democratic papers of these United States. [Ap-

Then in the campaign of 1878 we had a solid south, solid for the repudiation of our national debt, made solid by murder and outrage, by shot-guns and whips. It is solid for robbing the treasury of the United States for the payment of untold millions of rebel claims against the Government, and it is solid, after getting all it can from the treasury of the United States, for the repudiation of the balance. A solid south for those objects means a solid north to thwart those objects. [Applause.] And I predict, that although, after the 4th day of March, the rebels will have captured—when I upon themselves will not maintain the national honor." And during the years northern men who occupy seats in the

majority in the Democratic caucus of both Houses, and a majority in the caucus controls a Democratic Congress. I care not who you send there to co-operate with the Democratic party of the south, he is controlled, and must be controlled, by rebel influences; and I predict, my fellow-citizens, that whether you nominate for your standard bearer in 1880 the man who they didn't love and did hate, and yet dear to the United States—Grant [prolonged applause]—or whether you nominate that gallant standard bearer Blaine, of Maine [great applause], or whether you nominate John Sherman, the present Secretary of the Treasury [mild applause], that you and I will march shoulder to shoulder to rescue from the grasp of rebel generals and rebel brigadiers the capital of the nation.

Fellow citizens, again thanking you for the high honor you have conferred upon me, I wish you, one and all, that neaven's blessing may rest upon you, [Great and long continued applause].

Ex-Gov. Bagley said:

MY FRIENDS-I want to say that I ove the state of Michigan; I want to say too that I love the Republican party of the state of Michigan. The first vote I ever cast in my life was for that party. The last vote I cast was for that party. In it is my home, in it is my life, and in it is my heart, and I am glad always to be with Republicans when they get together in council for any purpose whatever; and I bring to the altar of Republicanism, always and at all times, and in all places, every personal ambition, every personal hope that I have in this life of mine. I believe in the Republican party of the past, I believe in the Republican party of to-day, and I have the most abundant faith and abiding hope in the Republican party of the future. [Great applause.] It is as necessary to you and to me, it is as necessary to us in Michigan, it is as necessary to the better interests of the men of the South to-day as it ever was. Its ideas, its theories, its examples are needed all over the South. The example Republicanism gives to Michigan of good government, the example of Republicanism as it is in the state of Michigan of education and civilization, of confidence and belief in our ideas, is needed to-day all over this Union, and the Republican party can never die. It never will die. Parties never do die-they occasionally commit suicide, but the die in no other way, and we cannot till our mission and our duty and the demands of the time and day are all fulfilled, to the very brim of the cup.

We need to carry into the South to day the ideas that have made Michigan blossom like the rose. Our ideas of education, our ideas of freedom, espe-cially our ideas of freedom of thought and of vote and of doing our daily work, want to be sent all over this land—and our mission is not done to day-it will not be done in all the centuries that are to come until these things are accomplished. We need in the South, and to the South, and to all the people everywhere to say that the ideas of the North must prevail. The ideas that our Puritan fathers brought with them to our shores have got to govern and control this country. thought, to me, is the thought of two civilizations contending, and strongest, and the purest, and the sweetest and best has got to govern. This is the thought we want to carry in my judgment, into the South. We want to say to them: you must educate all your people; you must protect your people in every right, having first educated and fitted them for their rights. If the state will not do it then the General Government ought, and the the nation's will and the nation's pow

er, shall be put under our feet forever. The miserable heresy of State rights now lifts up its head again all over this land. We fought the war through but without squelching, without bury ing beyond every chance of resurred tion, that miserable heresy that some day or other, if perpetuated and put in power, would divide us once more into a mere rope of sand.

We want to see to it, in the Senate and House of Representatives, in all our public actions and in all places where we have powers, that these ideas of education and universal suffrage. and the right of every man to cast his vote as he sees fit, and in his own way, become the law of the land, not only in Michigan, but in South Carolina, in Mississippi, as well as in Maine and Massachusetts. This is the mission of our party, the party that you and are so proud to place our belief and faith and hope in. I would see to it, by legislation and then by executive force joined to legislation, that the man who laid the lightest finger upon the crookedest hair of the baldest headed African citizen in the whole South should be punished—[applause]—that the negro should be able to walk to the liberty of an American citizen as much as you and I and all of us. And this is why you and I and all of us are Republicans to-day. It has made us Republicans in the past, it will keep us and our children and our children's children Republicans in the future. This is the mission, this is the duty, this is the errand of the Republican and belief of every Republican in this

I am very much obliged to you all for your very kind compliment to me. I am obliged personally for very many favors from the Republican party of Michigan. They have been better to made Michigan, that has made freedom and education and belief in our ideas the keystone, the corner-stone of this government that we love so much. Good-night.

If the next State Fair offers a prize for full-blooded scape-goats, Pelton

MICHIGAN UNIVERSITY.

THE UNIVERSITY.

We present our readers this week with a small but well executed cut of the State University at Ann Arbor, or rather of the main building, for the law building, medical building, chemical laboratory, observatory, hospital, homeopathic college and other buildings which together make up the University proper are so widely scattered that their representation on a single plate would be quite impossible. We select the University Hall because it is the largest most conspicuous and most representative of the group. For many years the south and north wings as they appear in the cut, existed as separate buildings and were united by the erection of the large central structure about seven years ago. It is used for the purposes of the literary or academic department and, with the exception of the new State Capitol, is the most imposing structure in the State. On the right hand of the central and main entrance is the President's room, in which are held the meetings of the faculty and the Board of Regents, and beyond this the office of the Steward. To the left of the entrance is the large chapel where the students of the department are assembled for religious exercises or other purposes. Above these apartments, and occupying near ly all the upper part of central building is the University Hall proper, a large amphitheatre-shaped audience room with ample stage, galleries, etc. Here are held the annual commence ment exercises and public entertainments which require accommodation for the largest audiences. The north wing is mainly devoted to the museum and the south wing to recitation rooms.

THE CATHOLEPISTEMIAD.

The first idea of the State Universty dates back much farther than is generally supposed, having originated, it is claimed, with that renowned or-der, the Jesuits. Upon an ordinance of the Congress of the Confederation, in 1785, for the best mode of disposing of the western territory is based the foun dation of the educational superstruc ture of the State embraced in that territory, and in the following year the negotiations which led to the first appropriation of land for university pur poses were commenced by an Ohio company. The first definite plan seems to have been that adopted by the Territorial Government in 1817 and is en titled "an act to establish the Cathole pistemiad or University of Michigania. This provided for a curiously elabor ate institution to be supported by fif-teen per cent. of all the State or terri-torial taxes and fifteen per cent. of the proceeds of four lotteries which the authorities were authorized to draw. The same year Governor Cass appointed John Monteith, a Protestant, first President, and Rev. Gabriel Richard, a Catholic, "didactor" or professor, and the corner stone of the new institution was laid September 24th, at Detroit, with appropriate ceremonies by the Hon. A. B. Woodward, presiding judge of the Supreme Court of the Territory. In 1821 the institution was reorganized and placed in the hands of twenty-one trustees, and five years later Congress set apart two townships for the support of the infant University. It is a curious incident in the history of its finances, that 1,200 acres of this grant embraced the present site of the city of Toledo, which the trustees sold for 317 an acre, though it was soon worth thousands and is now doubtless worth millions of dollars. This was, of course, before the "Toledo War," when the Ohio line was considerably farther might accomplish for every bit of south than it is now.

REORGANIZATION.

In 1837 the institution was again re organized by the creation of a Board of Regents, with power to appoint a chancellor and professors. The regents were appointed by the Governor and the University removed to Ann Arbor. The disposal of the grant of land was intrusted to the State, which loaned the University \$100,000. Branches were established at Detroit, Pontiac, polls, to churches, to schools, in the full Niles, Monroe, and other points, as preparatory departments to the University, but they were discontinued about the year 1848. The first college building, that now occupied by the museum, was completed in 1841, and September 20 following the first college year opened under Prof. G. P. Williams formerly in charge of the Pontiac branch and Prof. Joseph Whiting party, and we here and the representa- of the Niles branch. In 1842 the fatives we send to Washington, and the culty consisted of four professors, and representatives we send to represent the first class of eleven students was us everywhere, I know and feel, will graduated in 1845. The building used have with them the power and strength | principally for recitation rooms—the right hand wing as shown in the cutwas erected in 1848. The following year the first steps were taken for founding a medical department. Drs. Sager and Douglas were appointed professors, a building commenced, and October 20, 1850, the department was me than I ever deserved, but after all formally opened with ninety-one stuit is the Republican party that has dents. About the same time the law made me, that has made you, that has was again changed, and the regents have since been elected by the people. The Rev. Henry P. Tappan, D. D., of New York was chosen first President or Chancellor of the University in 1852, holding the office till 1863 when he was succeeded by Dr. E. O. Haven, Its subsequent history is too fresh in the mind to need rehersal. The law department opened in 1859 with nine-

matriculation in 1871. The Homeo pathic College was added in 1875, the Dental School, School of Mines, and other branches soon after.

THE CAMPUS. The University ground, or Campus, of which our cut gives but a faint idea, forms a notable feature of the surroundings and leaves quite an impression upon the mind of the visitor. These grounds were originally an "oak opening," a sort of heath overgrown with stunted oaks and hickories, and were first owned by a Mr. Rumsey whose log cabin stood for many years near the house afterward occupied by Mrs. Judson. In 1839 the farm had fallen into the hands of the Ann Arbor Land Company, who, "in consideration of one dollar to them in hand paid, did grant, bargain, and sell to the regents of the University, and their uccessors in office forever, to have and hold for the purposes of said University all that parcel of land lying in, situate," etc., the same amounting, we are told, to "forty and thirty one-hundredth acres." The Campus is nearly square, slopes slightly toward the east, lies on high land in the eastern part of the city, and is surrounded by broad avenues and handsome residences. University Hall faces the west or State street side, though at a considerable distance from it. North of it stands the law building; back of it he chemical laboratory, and beyond that on the easterly edge of the Cam-pus the medical building. On the north and south fronts are four smaller buildings originally intended as residences for the President and members of the faculty.

TREE PLANTING.

In 1855 Mr. Pettibone, surveyor of the grounds, began the work of ornamentation by planting thereon thirtythree shade trees. The students added three hundred and the regents one thousand and thirty more. Messrs. Ellwanger & Barry, of Rochester contributed a fine assortment of rare evergreens including Austrian, Russian and Scottish pines and Norway spruces and silver firs. In 1858 the seniors planted fifty maples in circles about a native oak, each maple standing for a senior and the oak, for Dr. Tappan. The juniors, not to be outlone, planted forty-four hickories in the form of a conjugate hyperbola near the center of the campus, but the hickories did not flourish, and were afterwards replaced by elms. The same year the sophomores planted a group of evergreens near the medical building, and the freshmen a group of fiftymemory of the students and professors Campus must now number over three thousand and include many rare and beautiful specimens. The class of '61 placed a curious boulder of jasper conglomerate near the northeast entrance; the class of '69 a similar boulder in front of the recitation building, and the class of '70 a bronze statue of Frank-From one of the most uninviting "slashings" the Campus is gradually becoming one of the most charming spots in Michigan, an encouraging ex ample of what persistent tree planting waste land in the State.

THE ART MUSEUM. Next to the impression made by external appearance of the buildings and Campus, the visitor is apt to carry away most agreeable recollections of the University Museum and the wonders of science and art stored therein No cuts or description could give any adequate idea of it, and we can only call attention to it as something no visitor to the University should fail t see. The specimens numbering hun dreds of thousands cover all branches of natural history and are constantly increasing in number. The credit o starting the art museum is due, we be lieve, to Prof. Frieze and the work of enriching it has been carried on by him in the face of many discouragements An art museum as means of æsthetic culture was a thing unknown among American colleges, and the Profess urged the project with considerable anxiety as to the result. After a win ter spent with much debate and lay ing of plans in faculty meetings, Prof Frieze sailed for Europe in 1856, hav ing a small sum with which to make purchases of works of art. To these first purchases others have been added from time to time, mostly through th contribution of friends, until the collect tion now numbers several thousand and includes many works of grea

THE OBSERVATORY.

But the branch which has carried the fame of the University to the re motest corners of the earth, is the as exceptionally fortunate in its management and has given remarkably rich ment and has given remarkably rich that its manage and sunday excepted. The staturday excepted is the staturday and sunday excepted is the staturday and sunday excepted. tronomical observatory. It has been

ty students. Ladies were admitted to tory in connection with the University HENRY C. WENTWORTH, G. P. & T. A., Chicago.

was made by Dr. Tappan in his inaugural address as Chancellor, in 1852. At a meeting held in Detroit a few days afterwards the Chancellor again urged the project with such success that Gen. Cass, Hon. H. N. Walker, Senator Chandler and Governor Baldwin headed a subscription for the purpose, each subscribing \$500. The Chancellor then made arrangements with Mr. Henry Fitz, of New York, for a first-class telescope to cost \$6,000, and then visited the principal observatories of Europe where he procured an outfit of astronomical instruments. Mr. Walker further proved his love for science by paying out of his own pocket \$4,000 for a meridian circle. The building which is on an eminence one hundred and fifty feet above the Huron river and at a considerable distance northeast of the Campus, was completed in time for the reception of the instruments in 1854. Its original cost was about \$15,000, nearly all subscribed by citizens of Detroit and Ann Arbor. Dr. Brunnow, of the Royal Observatory at Berlin, was chosen first director of the new observatory, entering on the discharge of his duties in July, 1854, and being succeeded in 1863 by Prof. J. C. Watson. Numerous additions have been made both to the building and its outfit, and it is safe to say, the reputation of the observatory for good work is second to none in the world.

PRESENT STATUS.

The growth of the University as a whole has been remarkable and reflects great credit on the forsight of its founders and the generous appreciation of the public. The annual calendar just issued shows the total number of students in attendance to be 1,372, being considerably more than at any other university or college in the country in America. Of this number 441 are in the literary department, 406 in the law, 329 in the medical, 71 in pharmacy, 68 in Homeopathic College, and 62 in the Dental School. Nearly one-half or 661 are residents of Michigan, 131 from Ohio, 100 from New York, 94 from Illinois, 81 from Indiana. 66 from Pennsylvania and smaller numbers from nearly every other State and Territory in the Union, while eight foreign countries are represented. All the departments except the literary are self-supporting and it is hoped that will soon be self-supporting also. The success of such an institution should be a subject for congratulation to the whole State.

THE OLD MAN BOOTH.-The old man, you know, liked his "tod," and when under its influence did some very funny things sometimes. One day he took an old "busted" musket from the green-room, and jumping into one of Jake Penters' old coaches, rode ten miles out in the country. He was, starring "Spartacus" at the time, and the play couldn't go on without him. So the boys closed the theatre and started out to hunt him up. After three days' search we found him sitting by the side of a ditch about fifteen miles out of town, trying to shoot an imaginary bullfrog. We brought him back, and after that a big fellow named Flynn kept watch over him. Wherever he went Flynn would also go. They would eat, drink and sleep together, and finally Flynn got to be as bad as the old man, and one night, while they were in Charleston, Booth tried to smother Flynn by stuffing a pillow in his mouth, and latter defendone maples in three parallel rows near ed himself with a poker and broke the the northwest entrance, The ever-poor old man's nose. Booth got \$125 poor old man's nose. Booth got \$125 greens in front of the museum were planted by Prof. Fasquelle and the "Ned" isn't to be compared to him. elms in front of the south wing, maples Now, there was Wilkes. He was an in front of the whole Campus by Prof. actor. Just like the old man, too—as White, now President of Cornell Unicrazy as a bed-bug. My, how he used versity. Many of the original trees to dress! I heard him say once, about have died and been replaced by others, five years before he shot the President, but enough remain to keep green the that he was going to do something some day that would startle the world. who left these pleasant mementos to What he meant you can judge of as their successors. The trees on the well as I can.—Old Pop Reed in Philadelphia Record.

Farm Yard Song.

BY J. T. TROWBRIDGE.

Over the hill the farm-boy goes.

His shadow lengthens along the land,
A giant staff in a giant hand;
In the poplar tree above the spring,
The katydid begins to sing;
The early dews are falling;
Into the stone heap darts the mink;
The swallows skim the river's brink;
And home to the woodland fly the crows,
When over the hill the farm-boy goes,
Cheerily calling,—
"Co', boss! co', boss! co'! co'! co'!"
Farther, farther, over the hill,

Farther, farther, over the hill, Faintly calling, calling still,— "Co', boss! co', boss! co!"

Now to her task the milkmaid goes. The cattle come crowding through the gate, Lowing, pushing, little and great; About the trough by the farmyard pump, The frolicsome yearlings frisk and jump, While the pleasant dews are falling; The new-milch heifer is quick and shy, But the old cow waits with tranquil eye; And the white stream into the bright pail flows. Now to her task the milkmaid goes.

flows, When to her task the milkmaid goes, Soothingly calling,—
"So, boss! so, boss! so! so! so!"
The cheerful milkmaid takes her stool,
And sits and milks in the twilight cool,

Saying, "So! so, boss! so! so! To supper at last the farmer goes.
The apples are pared, the paper read,
The stories are told, then all to bed.
Without the cricket's ceaseless song
Makes shrill the silence all night long;

The heavy dews are falling.
The housewife's hand has turned the lock;
Drowsily ticks the kitchen cleck; The household sinks to deep repose; But still in sleep the farmboy goes
Singing, calling,
"Co', boss! co', boss! co'! co'!"

And oft the milkmaid, in her dreams, Drums in the pail with the flashing streams. Murmuring, "So, boss! so!"

THE ENSIGN'S SECRET.

From the Argosy.

Nearly sixty years ago, a young man came out of a little house at the east-ern end of a town by the sea. There was plenty of life and gayety at the other end of the town, which was enlivened by one or two barracks, a fort and a castle. But the eastern end was very poor, and would have been quite lonely but for the fishermen and their boats. The house from which the young man came was beyond even this homely bustle, and was little more than a wooden hut, tarred to defend it from wind and weather. Its only near neighbor was a windmill, whose gaunt arms were almost over its humble roof; and, through its windows and door step were clean and its curtains white, it was clearly a very poor place, where none but very poor people would live.

But the young man who came out was in full dress of a military officer. though that was screened from first view by the long gray cloak which the wild March wind made so necessary He looked back and waved his hand toward the little house, as if he knew that somebody there was watching him, though, certainly, nobody could be seen from the outside. And then he turned and struggled against the strong gale which blew in from the

He was quite young, and his face was finely cut, and would have been pleasant but for a look of stern and painful sorrow, not unmixed with bitterness, which seemed strangely incongruous with his years and his dress.

He walked on quite through the town. There were few people taking exercise for pleasure in that rough weather, and the crowd of shipping in the Downs made the seaward view almost less lonely than the shore. It was a very simple little town with red tiled decent dwelling houses crowded forward toward the sea, as if their inmates wanted to watch the boatmen and fishers from as near a point as "If the general will come with me to they might. Wherever the houses the ante-room," said the young man, broke apart, one caught glimpses of a wild flat country, dotted here and there touched his box. But this public exwith weird trees in Indian file; and the youth looked wistfully toward the desert fields, as if he would fain have struck away across them, instead of going on, as he did, toward the grim

old fort. Yet there, it was clear, festivity was going forward, and friendly voices greeted him as he passed the gray old portal. And then, over his stern, sad face, he dropped a mask of gayety, and though he relapsed into silence at times, he was as polite and conversible

as the best of them. There was a preparation for a dinner-party in the fine stiff old hall, with its rows of military portraits, and its dingy, bloodstained banners. The castle, the barraks and the fort itself had eagerly furnished guests to welcome the visitor of the day, a grand old general recently from honorable victories

in the south of Europe. After dinner, when the ceremony was fairly thawed, the good old general in the kindliness and pride of his heart displayed a little box, which had been given him by some grandee in Spain. It must have been too small for a snuff-box, and was probably one of those tiny trifles in which fashionable folk used to carry comfits and lozenges. At any rate, this box was set with diamonds and colored gems of rare value, and it passed from hand to hand, flashing brightly in the lamp light, while the old warrior told dread stories of his campaigns, and of the daring and honor of his men.

But suddenly, at the end of a story so thrilling that all heads had been craned toward him, while the military servants had thronged the door in rapt attention, the simple question was ask-

"Where is the general's jeweled box?

Nobody knew; everybody said that he had silently passed it on to his fel-

The general rumaged his own pockets. lest it had found its way back to him and he had half-conciously put it away. No, it was not there, and the brave old fighting face looked a little black, and before Lady Elizabeth and I leave for he murmured an excuse about "how its | London." loss would vex Lady Elizabeth."

"But it cannot be lost, general," cried this room it was a few minutes ago, and in this room it must be still. No "Sir," cried the old general, can you and in this room it must be still. No belief not one of them has approached he went on, seeing that the company pittance of pay. I fear I was an eye- cane."

out. Let the door be made fast and let our search be thorough."

The candles were brandished to and fro, under the tables, under the chairs, round the table drapery. But from no point flashed out the brilliant beauty of the little box.

"Still it must be here," insisted the commandant, "and surely no gentle-man will think his honor infringed if each in turn is asked to empty the contents of his pockets upon the table. I myself will be the first to do so. And

the servants shall be the last. Nobody could be expected to demur at so simple and sensible a proposal, backed as it was by the honest old officer instantly rattling out some crown pieces and a tobacco pouch, half-pence, and an old pipe. One after the other, the gentlemen on either side of the table followed his example, while sharp but not unfriendly eyes took eager note of strange pieces of personal property, and of dainty three-cornered notes, which might serve in the future as material for bandinage and quizzing.

But one drew back when the commandant made his proposal. The young man who had walked in from the eastern end of the town dropped suddenly into his seat, whence he had risen in the first eagerness of, the search. He passed his hand once or twice, nervously, through his hair, leaving it wild and straggling. And then he watched blankly, as the fruitless search drew nearer and nearer to himself. Within five minutes later, one or two of the officers were whispering to each other that any simpleton might have seen he did not expect it could be found.

His turn was the very last. "Ensign Ranson," said the commandant steadily. Ensign Ranson was certainly the first who had required to be called upon by name.

The youth arose. And though the rest of his face was of a deadly whiteness, there was a spot of burning red on each cheek.

on each cheek.

"I don't think any gentleman should be asked to do this," he said. "I will give my word of honor, that the box is not upon my person. I did not even keep it in my hands for a moment; I merely took it and passed it on."

"Too high minded to look at such gew-gaws," sneered a spiteful old major under his breath.

"What men high in the sorvice and old enough to be his father have already done, Ensign Ranson may safely do also," said the commandant, with a severity which was not unkindly, for young Ranson looked such a boy among the crowd of men, mostly stout and middle-aged; and the very suspicion suddenly lowering over him made the old officer think of his own lads, growing up, and not quite sure to do well for themselves, after all.

"I would never have asked it for the sake of my box," observed the general, leaning back in his chair, and inwardly wondering what Lady Elizabeth would say of his carelessness.

"But we ask it for the sake of our honer general," said the commandant

"And we do not seem to have asked it needlessly," whispered the spiteful

major. "I will not do this thing!" cried young Ensign, passionately, and he ooked wildly round the group, as if prehend and compassionate his misery. box lost that night. Here it is." The face which looked the kindest was that of the old general himself, partly because it was not his hospitality which was outraged, partly because his genial nature was terribly shocked at finding anything of his the cause of such a wretched act of dishonor.

"I will convince him that I have not part, now took up the parable. posure I will not submit to; our con-

sent was not asked, and—"
"Certainly not!" "Out upon you!" "General, you must not think of indulging his insolent request," were the only sentences audible in the general hubbub that arose on every side.

But the general rose. "Gentlemen," he said, quietly, "I have never yet refused to listen to an enemy's petition. If you can satisfy me, sir, perhaps your comrades will take my word for you."

There was a murmur of very reluctant acquiescence, as the ensign bowed and waited respectfully to follow the general to the ante-chamber. They had not disappeared behind the heavy curtains before all sorts of surmises were whispered round the table, guesses and hints so wild and smister as to do credit neither to the heads nor hearts which originated them. The general and the ensign staid a longer time in the ante-room than would have sufficed to search the ensign's pocket twice and thrice over. Not a sound could be heard. If any conversation was going forward, it must have been in a very low voice. The two gentlemen were away for nearly half an hour. All the military servants had been subjected to the commander's rigid scrutiny, and then dismissed. might be as well that none but the 'gentlemen of the regiment" should know exactly what the end was. The delay grew first awkward and then awful. Even the whispers and rumors flagged into an excited watching.

At last the general and ensign came out. The ensign's face was still very pale; what flush remained upon it had mounted to the eyes. The old general was blowing his nose.

"Ensign Ranson has thoroughly satisfied me," he said, in his most genial minutes and toyed with his wine-glass, voice. "Never mind my box. It has as if he quite forgot where he was. vanished by one of those mysterious accidents which will happen somehow. It will be found some day. And, now, gentlemen, perhaps, as we have been thus broken up, we shall not settle down again very comfortably to-night. I hope we shall see you all at the castle

"General," said the commander, drawing him a little to one side, "may I say chicken's wing.

that I sincerely trust your great gener
"Gentlemen," he said, in the same the officer in command of the fort, "In | that I sincerely trust your great gener-

gentleman, to his knowledge, has it in imagine that any mistaken idea of

the table since the box was brought were not unaware of his little by-play. "I pledge you my word that I am satisfied of Ensign Ranson's honor, and whoever dares to doubt him makes me to be his accomplice.'

And the general seized the young ensign's arm, and marched him from the banqueting room, while every one sat dumbfounded, till the spiteful major remarked that wonders would never

There was nothing more to be said. It was discovered that Ensign Ranson was not only invited to the castle with the other officers, but was also asked there by himself, and actually was believed to have taken tea with the general and Lady Elizabeth in their deepest retirement. For the general's sake, rather than his own, his brother officers continued on courteous terms with him; and he had always been so shy and held himself so aloof, that perhaps he did not discover there was but little cordiality in their courtesy. And presently he exchanged into another regiment, which went on foreign service.

He was away for several years, and in the fortune of war he got rapidly promoted, so that when he returned home, though he was still young, he was no longer a poor nobody. When he landed in his own country, he found a letter awaiting him, written by one who had sat near at that memorable dinner party, and who was now residing in the old castle where the general and Lady Elizabeth had then been guests. This letter pressed him, in the warmest terms, to spend some of his earliest days in England at this very castle, and so give many old friends who were in the neighborhood an opportunity of meeting and congratulating him. Ensign, now Colonel Ranson, smiled a little strangely when he read the invitation, but wrote a very polite

reply and accepted it. Once more he sat in the stately old banqueting-room of the fort. This time he had not walked in from the bleak east end of the town, but he had been driven to the castle in the chariot of the castle's owner. But as he took his seat in the chair of honor, he noticed that every face at the table was, in all its changes, familiar to him. All of the guests at the former dinner were not there. Many of those, indeed, he well knew, were sleeping on battlefields far away. But nobody was at this dinner who had not been at that other one.

Once more the dishes were removed and the servants withdrawn. guest of this evening was no wonderful story-teller, like the good old general, who had now passed to his rest. Col. Ranson was as taciturn of Ensign Ranson had been shy, and he even let the conversation flag, and never seemed to notice it.

"Colonel," said the eldest gentleman of the party, speaking with visible effort, and giving a slight cough to veil his embarrassment, "Colonel, I think we all remember another time when we dined together here."

"Certainly, I remember it," answered the colonel, raising his gray eyes, with a cool light in them.

"Colonel, we fancy you think some of us did you ill-justice then. least, a lady says you felt so—Lady Elizabeth, the good old general's widow. If what we are going to do is in any way painful to you I hope you will pardon us, for we are only followhe sought for one face that would coming her counsel. Colonel, there was a

"Yes, there it was, gleaming once more in the light which danced gayly upon it. The colonel looked at it calmly and asked:

"Where was it found?" His composure was exceedingly disconcerting. Another gentleman, feeling that the first had been done his

"It was found in the very chair on which you are now seated, colonel," he said. "You will remember that the general sat there on that night. It general's own hands, and in the interest and excitement of his own story-telling he must have intended to slip it back into his pocket, which, if you recollect, was the first place where he sought it. Instead of that it evidently escaped the proper orifice, and dropped into the covering of the chair; that covering was very thick and heavy, and hung in lappets about his legs. Part of it was unsewn, and this box dropped between the damask and lining, and remained there, safely and unseen till the chair was recovered last

vear. "Gentlemen," said the colonel, with his accustomed calmness, though his lip trembled a little, "I cannot wonder if some of you thought my conduct suspicious. I thank you heartily for showing me your brotherly delight that those suspicions were unfound

At the bottom of the table sat the spiteful old major (he was on half pay now, and more spiteful than ever), and he thought within himself that there was no knowing whether Ensign Ranson had not taken some subsequent opportunity of getting rid of his dangerous booty into the hole in the damask, and that the mystery could not be called cleared up unless the colonel had explained why he had demurred to the search. And this spiteful old major would have said so much to his nearest neighbor if he had not been so terribly deaf he could not regulate his own voice between a confidential whisper and a mighty shout.

The colonel sat in silence for some Then he recalled himself with a start, and, drawing some thing from his own pocket, said quietly:

"Gentlemen, I, too, have something to show you.

All pressed ftrward as he carefully unfolded the soft paper packet and laid something on the table. What was it? What could it be? It was the bleached skeleton of a

quiet voice, which no longer sounded strength and sweetness, "when I was

sore to some of you. I think you felt that my appearance did not do justice to the dignity of my regiment. I be lieve I often looked rather shabby, but in reality I ceuld not help it. I had only one relative in the world, and that was my mother's sister. After my mother died she had been as a mother to me, but when our home was finally broken up, there was nothing for it but she must be a governess in a stranger's house. And she did her work courageously and carefully enough till her strength failed and nobody wanted

the services of a sick woman. "She had always been good to me. And we two had only each other in the world. I could not help her as she ought to have been helped, but my pay would at least provide her such a home and such a maintenance as a poor working man can give a poor working woman. I took my aunt to lodge with the wife of the miller's man in the little black cottage beside the hill. was a kind, cleanly woman, though rough and plain in her ways, and my poor aunt used to call herself happy there. But she could not eat the simple food my scanty means could procure. And the good landlady used to break my heart by suggesting that her appetite might be tempted by chicken or game, or such other luxuries beyond

my utmost reach.
"All the day of that memorable dinner-party my aunt had been very feeble and falling. When I left her really wondered whether she would be alive when I saw her again. My soul revolted at the sight of dainties which were of no good to me, and which I could not convey to her who seemed lying for the want of them. Suddenly a bright idea siezed me. I took a etter from my pocket and spread it on my napkin, and then, by an adroit movement, transferred the wing of a chicken from my plate to the paper, and thence smuggled it to my pocket.

The listening guests began to look at each other with enlightened eyes. The spiteful old major felt that a very full explanation was being given, and he need not hear it!

"Gentlemen, you can all imagine my feelings when such unlooked for circumstances threatened to expose my poor little plan. Gentlemen, there are some of you who were, like myself, young then-whom it would have been

as hard to meet after such a discovery as it would have been, had I really stolen the jewels." "Heaven forgive us, Ranson, but I can't say you are wrong," said one brave gentleman, who had been a fashionable dandy in those days, but who

had a wife and six children now. "Gentleman, I did not fear the old man, honored and enriched by a grateful country. The men who have fought the best battles of life have ever a pitiful respect for the poor and the friendless. To him I could lay bare my poor little secret. But my place then was among the young-the young who, having never conquered, always dispise the defeated—the vain, giddy youths, extravagant with their father's money, and-"

"Oh, come, Ranson," cried one officer, it is your turn now with a vengeance. Please to remember that to-night we are the abject and the defeated-and be merciful.

The colonel laughed. And they could not tell whether it was with good faith or subtle irony that he rejoined,

You are right," and then went on: "In that little room yonder I told my sad story to that good, great man who is gone. And I folded up my queer treasure for I could not leave it behind to bear witness; and, besides, having paid such a terrible price for it, I did not see why my aunt should not have it. And she ate it for her supper that very night, and next morning, almost as soon as it was light, there was the general, hammering at the cottage door, with a basket of fowls and fruit carried in his own hand. And then must have found its way back to the and there, I took this little chicken bone, and vowed that I would keep it till the snuff-box was found, and I myself was such a man among such men that none would smile at my poverty,

or even despise my weakness. Do not be too sure that there can be but one sort of reason for secrecy and that a bad one. We should never think evil while it is possible for us to imagine good. Perhaps it is because God knows of so much goodness, which we never hear about, that He has patience with the world.

The Arlington estate, near Washington, now used as a national cemetery s claimed as the property of Gen. G W. C. Lee, eldest son of Gen. Robert E Lee. It was the property of G. W. P Custis, who by will devised a life in terest in it to Mary A. Lee, wife of Robert E. Lee, and on her death it reverted, as an absolute bequest, to her son, G. W. C. Lee. The Government came into possession of it by buying it at a a sale for taxes, the unpaid tax being the direct taxation of Congress under the act of 1862-63. It seems that a friend of the family at that time in Washington made a proffer of payment of this special tax, but the commissioners refused to receive it, under their rule not to accept the payment of taxes from any person not absolutely interested in the property taxed. Judge Hughes, of the United States Court at Alexandria, Va., has just decided that the commissioners had no right to make any such rule. Young Lee does not purpose to take posses sion of the estate or disturb the existing order of things, but wants fair payment for the property.

No wonder Paris can have the finest opera in the world, when the government furnishes a grand opera house at a cost of \$13,000,000 and gives a manager \$160,000 a year to pay expenses. This manager, by the way, gets a salary of \$5000, \$1600 more for house-rent, \$1000 for his carriage and half of the profits, which have brought him in \$334,000 in the last eight years. The state pays for new scenery, new music cold and stern, but rather full of strength and sweetness, "when I was mounting "Hamlet," \$38,000 for "Don his possession. Let the servants at the kindness would cause me to make you door come in, though to the best of my a companion of thieves? Gentlemen," here before I was a poor fatherless lad, Juan," \$39,000 for "Faust," \$45,000 for "L'Afri-

THE HOUSEHOLD.

Stains produced by lemon-juice, vin egar, or other sharp corrosives, may be removed from silk by adding a little pearl-ash to soap-leather, and passing the material through the liquid. Spirits of hartshorn will restore the color.

To restore steel ornaments, take a few ashes from the common kitchen range; rub them almost to an inpalpable powder, and sift them through a piece of fine muslin. Apply this to the ornament to be cleaned with a bit of chamois leather, after which dust out the powder thoroughly.

Soup for invalids and delicate chil lren should be made from lean beef chopped as fine as mince-meat, added to its own weight of cold water, and allowed to come slowly to the boiling point. Two minutes' brisk boiling is sufficient time for cooking such soup, which should be strained, and then carefully seasoned.

KING CAKE.—Three-quarters of a bound of butter, one and a quarter pounds of sugar, one nutmeg, six eggs, and cup milk; flour to make an ordi nary batter.

INDIAN BAKED PUDDING.—Take two quarts of sweet milk, boil one quart, and while boiling stir in as much fine Indian meal as will make a very stiff batter; add a teaspoonful of salt and make very sweet with molasses. Butter a pan and pour the batter in, and pour the remaining quart of cold milk over Cut little bits of butter and put on the top, and bake two hours in a moderate oven.

Swiss Roll.-The following, if not equal to the Swiss rolls sold at pastry cooks', is not a bad dish. Take the weight of three or four eggs, in their shells, of finely powdered sugar, and the same weight of butter and flour. Melt the butter, and the sugar and the yolks of the eggs, beat the mixture well, add the beaten-up whites of half the eggs, then half the flour, the rest of the whites (also beaten up) and of the flour. When quite smooth spread it out, about half an inch thick, over a well buttered tin, and bake for fifteen or twenty minutes in a moderate oven spread it all over equally with jam, roll it up and put it into the oven again for a short time, sprinkle with powdered sugar and serve cold; if liked, with a custard round it.

SCALLOPED MUTTON. - Cut cold boiled or roast mutton into bits, re moving all skin and gristle. If you have no gravy, make it by stewing the scraps and bones in a little water, then season with pepper, salt and tomato catsup, and strain it over the meat. Boil some potatoes, and mash them while hot until they are free from white and light; add a lump of butter, some milk, and lastly a beaten egg Mix well, then place the meat and gravy in a pudding dish; spread the mashed potato-which should be quite soft-smoothly on top, brush it evenly with a beaten egg and bake it in a quick oven until it is a beautiful golden brown. This makes an excellent breakfast dish and can be prepared-ready for baking—the night before. Espe cial care should be taken to have plenty of gravy, as it is absorbed in cooking, and the dish will not be so palatable if too dry.

Carpets have changed in character of late years, for it has been clearly demonstrated by oculists that the large staring designs injure the eyes and produce a headache. The experience of any one will show in living or visiting where glaring carpets are in use, and especially in examining various rooms in hotels or residences, where new and intensely bright carpets have been laid down. After a visit of inspection of this kind it is singular how ter and flour. Season with salt and certain the carpet headache will prove to magnify itself. Small designs, except the rooms be very large, are the fashion, and these designs are usually in subdued colors, the dead oriental hues being in immense vogue.

ENGRAVED silver frequently becomes unsightly to the "particular" housekeeper, by reason of the dust and cleaning powder which have settled in the cavities, and become black. Such discolorations may be removed by using the settlings of water in which potatoes have been boiled. Plated ware may be cleaned in the same manner.

NEVER slight a good apple when you can find one. A raw, mellow apple is digested in an hour and a half, while boiled cabbage requires five hours. The most healthy dessert that can be placed on a table is a baked apple. If eaten frequently at breakfast, with coarse bread and butter, without meat or flesh of any kind, it has an admirable effect on the general system, often removing constipation, correcting acidities, and cooling off febrile conditions more effectually than the most approved medicines. If families could be induced to substitute apples, ripe and sound, for pies, cakes, and sweetmeats, with which their children are frequently stuffed, there would be a diminition in the total sum of doc tors' bills, in a single year, sufficient to lay in a stock of this delicious fruit for the whole season's use.

COCOA SHELLS. — Put two table spoonfuls cocoa shells into a little cold water; add to them a pint of boiling water, and boil for an hour; strain and add a pint of rich milk; let it come to a boil and serve. This makes a delicious drink, and very acceptable when coffee and tea are found to be injurious.

SPIRITS of turpentine is added to the water in which floors are washed previous to laying the carpet, to keep out moths.

POVERTY CAKES .- One pint of milk one teaspoonful of saleratus, two eggs Make them just stiff enough with In dian meal to work into balls, and boil them in hot fat. To be split open and eaten with butter.

CUP CAKE.—Cne cup of white sugar, one-half cup of butter, two eggs, two cups of flour, one teaspoonful cream tartar, half teaspoonful soda, half cup milk. Beat the butter and sugar together, and the eggs separately.

Doughnuts.—Take one cup of powdered sugar, four eggs, one cup of sweet milk, one-fourth cup of butter, tear his hair with envy.

one nutmeg, four cups of prepared flour; mix as soft as tea buiscuit; make them half the size you wish when fried; fry in lard; about five minutes will cook them. This receipt will make four dozen.

SPONGE CAKE.—One coffee-cup sugar, one coffee-cup flour, four eggs, one

BEEFSTEAK PIE. - The New York Herald says that this recipe is given by a thorough English cook, born and bred in Devonshire: 1. Make a crust of half a pound of suet, chopped fine: one pound of flour, half a saltspoon of salt, a teaspoonful of baking powder mixed together, and sufficient cold water added to make it a stiff paste. 2. Cut one-third of the paste for the cover of the pudding basin in which the pudding is to be boiled. Boil the rest of the paste to the size required to line the pudding-basin. Grease with butter the pudding basin, and lay the paste in neatly. 3. Take two pounds of beef cut in slices. Dip each slice in flour as you lay it in the basin along with two kidneys, a little chopped parsley, a bit of good butter the size of an egg, a few drops of Worcester sauce, a teaspoonful of water, half a saltspoonful of salt, ditto of pepper. 4. Roll out the paste, cover to the size of the top of the basin, wet the edge of the paste which lines the basin, then lay the covers on and press the two edges together. Dip your nice clean puddingcloth in boiling water, flour it, tie it over the top of the basin. 5. Place the basin in a saucepan of boiling water and keep it boiling four hours. For serving, take off the cloth, turn the basin over on a nice warm plate, remove basin. This leaves your pudding the round pudding shape on top, though the basin is flat. When you stick your spoon in, the gravy will run out, lucious and healthy, and the meat within will be as tender as a young chicken. The pudding-basin referred to is a bowl of crockery holding a quart with a thick rim around the top, which makes it easy to tie the cloth on with a string.

A School of Cookery.

Miss Maria Parloa is teaching a school of cooking in Boston, of which the local papers speak in very high terms. We give the formulæ of Thursday's lesson, which were successfully illustrated as the lecture proceeded:

CREAM CELERY SOUP.

Pint of milk; six stalks of celery; ablespoonful each of flour and butter; slice of onion; small piece of mace. Boil the celery in a pint of hot water from 30 to 45 minutes; mash and add to the milk, which has been cooked; add lumps, then beat with a fork until then the onion, mace and flour, butter, salt and pepper, and strain.

BOILED RICE.

Wash and pick all the specks from a cup of rice. Let it stand in cold water two hours, and then put it in a deep kettle, with two quarts of water, and boil fast for thirty minutes. When it has boiled twenty minutes, throw in a great spoonful of salt. When done, turn into a cullender, and set in the oven a few minutes. When ready to dish, shake lightly and turn into the vegetable dish. Never use a spoon. The water in which the rice has been boiled makes a nice starch for colored clothes. The Southern rice cooks much quicker and is nicer than the Indian rice. If possible, always purchase the former.

CHICKEN FRICASSEE.

Boil the chicken until tender, and then cut small. Make a gravy of the water in which it was boiled, allowing pepper and turn in the chicken, lettir it boil five minutes. Garnish wi boiled rice.

CHICKEN CURRY.

Make the same as white fricassee with the addition of one teaspoonful of Indian curry to one pint of gravy, if it is liked strong; if not, half a teaspoonful. Dissolve the curry in a little wa ter and stir in. Garnish the dish with rice. Veal and mutton can be curried in the same manner.

BAKED INDIAN PUDDING.

Three tablespoonfuls of Indian meal, one cup of molasses, two quarts of milk, two eggs, butter half the size of an egg, one tablespoonful of ginger, two teaspoonfuls of salt; boil one quart of the milk, and pour it boiling on the meal, then turn in the molasses, and next the cold milk, butter, ginger, salt and eggs. Bake five hours in a moderate oven. Serve with cream. The eggs and ginger may be omitted if you choose.

Into a pint of cream stir half a cup of sugar, half a glass of wine and a lump of ice; whip to a froth, and fill the QUEEN MERINGUES.

WINE WHIPS.

Whites of six eggs; cup of powdered sugar. Beat the eggs to a stiff froth and cut the sugar in very lightly; but on sugared paper and dry in a warm oven from one to two hours. Then take out the soft portion and fill with wine whips, as directed in rule above.

"Her talents are extaordinary, her beauty is famed, her ambition is lofty, her resolution is unflinching; but higher than talents, lovelier than beauy, grander than ambition, and more enduring than resolution, is her noble womanhood, with its subtle influences and glorious, unselfish impulses." THE NEW INDUSTRY.

YPSILANTI, February, 19, 1879. Mr. Editor:—I noticed in your paper of Feb. 15th an article headed "A New Industry," and as there is urgent need of industry and also of enterprise, whereby industry can be encouraged, I, with others, would like to have you or your contribtors give us a full outline of this business in which Mr. Murby has for several years been engaged. It seems of a kind to require the labor of a class of people who often find it difficult to obtain employment, and who are ready and anxious to work whenever the opportunity is afforded.

It is a well known to farmers and others that the one item of good woolen yarn for socks, mittens, etc., is almost a thing of the past; that with the yarn now commonly on sale one week of ordinary wear causes the heels and toes of the modern woolen sock not only to colapse but totally to dis-

appear.

Tradition tells of times before banks were much in vogue that a good stout stocking used to answer the purpose of a savings bank. Now that we have a gold and silver currency again, why can't we have a better and a sounder basis for socks, mittens, etc., so that in case storage is needed for cash the thread would be strong enough to hold

up a three-cent-piece? As I understand it a comparatively small amount of money would give this business a fair trial. Such enterprises are encour-aged and successful in other places. Let is know what there is to hinder the foundation of a company here where farmers and others have some spare capital waiting a safe investment; where also farmers can have their wool manufactured into yarn and have knit goods manufactured of genuine stock, and patterns and colors of their own Then also those whose labor is their capital can have an opportunity to invest and be a benefit to themselves and

Let us hear more on this and kindred Yours truly,

Ypsilanti, Feb. 19, 1879.

Editor Commercial:—In last week's issue, I noticed an article headed "A New Industry," referring to the manufacture of knit goods by Mr. E. Murby. I write this communication more as an addition to that, for the purpose of keeping the matter before the citizens of Ypsilanti, than for any intrinsic merit it may contain. It would seem to me, and, I think, to every person who is interested in the growth and prosperity of our city, that to secure this enterprise at this point is an object much to be desired, not only for the extra amount of business added and money brought in, but for many other reasons, a very few of which please allow me to lay before your readers. 1st. Directly in the interest of the farmer

is the fact that this business will consume a very large proportion of the wool which naturally comes to this market, and by having a home consumption for his wool the farmer can safely rely upon much better prices than when it goes through the hands of middle men. Besides this, he has the advantage of knowing that a better discrimination in the quality will be used, the grow-er having good, clean, light wool will stand a better chance of getting its full value, then when selling in the ordinary manner, when a margin of only two to five cents is allowed between the coarser and finer So much for wool.

2d. It offers good, paying and honorable employment for a large class of persons who find it difficult to get work and carry out their other designs at the same time. There are a good many poor but ambitious young women who are trying hard to get an education and fit themselves for respectable positions in society, whose parents are not able to afford the time or money needed for this purpose. This enterprise, if we are successful in securing it, will enable from thirty to fifty, and perhaps more, to employ their spare hours outside of school, and at home in the evening, and to earn enough to buy their clothing and school

3d. It will give employment to a large number of both boys and girls, besides machinists and other men around the estab--When the Ypsilanti City Band make water at his reception. [Deafening apeir annual parade to-day, in honor of plause.] Mr. Allen's idea is to use the powers. ment at least, of those who of necessity are now nearly idle. This point alone should recommend it to the capitalist, the business man and the philanthropist.

4th. Again, every person is anxious to see more money coming in than there is going out. This should be the general wish as a city, as well as for our individual pockets. This business will have that effect to a very great extent, and as the manufacturer rearchitect of the new Grand Rapids city hall), brought with him on his Wednesday's visit, a front elevation of the block. The stores are to be three stories in height (a trade will receive its proportion, unless personnel or the block of the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the stores are to be three stories in height (a trade will receive its proportion, unless personnel or the store of the store haps it may be the saloons, which steady employment may bereave of some of their present customers.

Hoping to see more and better arguments in favor of this enterprise, until it shall have become a fixed certainty, I subscribe Respectfully yours,
WILLIAM G. SHIPMAN.
